

Name: Aaftab Shaikh

Class: D20B

Company: Barclays

Package: Total Fixed Pay – INR 11.67 LPA + 1 Lac Bursary = 12.67 Lacs

Job offered: Yes

Job Location: Pune and Chennai

Eligibility Criteria: - CS & IT students from Final Year with $\geq 60\%$ score across class X, XII/Diploma and engineering semesters (all semesters) with no live KT's.

Rounds: -

1. Technical MCQs + Coding
2. Technical + HR interview

Round 1: -

The test consists of technical aptitude and coding questions. It was conducted on HackerEarth Platform. The difficulty level of questions varied from Medium to Hard level. We were able to switch from one question to another. The questions were asked from-

- C++
- Java
- Python
- JavaScript
- SQL
- MongoDB
- Servlet
- OS

Most of the questions in C++, Java and Python were related to OOPs, Exception Handling and output findings which was tricky. Questions from SQL and MongoDB were easy and medium level. +4 or +6 marks were given to MCQs based on their difficulty level.

For Coding, two questions were asked in which one was easy/Medium (20 Marks) and other was medium/hard level (50 Marks).

My first question was to check whether the given binary string is a valid or not. Here some of mine test cases were not passed so it was partially accepted.

The second question was like, a function was given which needs to be performed on every element of an array (only if possible) then return the minimum sum. If operations could not be performed then return the minimum element of an array. Again, here some of the test cases were not passed so it was partially accepted.

Round 2 (Technical + HR Interview): -

The interview was conducted on Teams and was both technical and HR interview. My Interviewer was mostly from non tech background (searched it on LinkedIn) so he didn't ask me any technical questions. My Interview started with questions like

1. Introduce yourself.
2. Explain any one of your projects. Since I participated in a Project Deep Blue competition, so I explained him my deep blue project. He then asked my contribution to the project.
3. He then asked me which parameter was considered during the model training in my project.
4. In which skill you are well acquainted with and are you ready to work on different technologies apart from the skills mentioned in resume.

Then some HR questions like

1. What is your strength?
2. What is your weakness?
3. Will you relocate to Pune or Chennai?

Then Interviewer asked me if I have any questions so I asked him two questions related to the company and then my interview was over. My Interview last for around 20 minutes.

Tips: -

- If you want to get placed in this company, just try to clear the 1st round which is very important. Go through the topics mentioned above in Round 1. If you are able to solve one coding question completely and pass some test cases of the other question with a good amount of MCQs, you will be able to clear this round.
- If you clear the 1st round there is 80% likely chance to be get placed in this company. Rest 20% totally depends on the Interviewer.
- Go through all the skills, projects, internships mentioned in resume. If Interviewer allotted is from tech background, then he/she will definitely ask questions from the skills mentioned in resume. So be prepared and try to include the skills you know and projects you worked on.
- If Interviewer allotted is from non tech background, then you can expect questions from the projects and internships mentioned in resume along with some HR questions.
- While giving the answers of HR questions try to relate with examples including the RISES values.
- Barclays emphasize on RISES (**R**espect, **I**ntegrity, **S**ervice, **E**xcellence, **S**tewardship) which is very important to consider these values while giving the answers in HR questions.
- You can find more info about RISES from [here](#)
