Rounds:

1. Technical MCQs + Coding
2. Technical + HR interview

Round 1:

The test consists of technical aptitude and coding questions. It was conducted on HackerEarth Platform. The difficulty level of questions varied from Medium to Hard level. +4 or +6 marks were given to MCQs based on their difficulty level. We were able to switch from one question to another. The questions were asked from-

- C++
- Java
- Python
- JavaScript
- SQL

- MongoDB
- Servlet
- OS

Round 1 also had 2 coding questions:

For Coding, two questions were asked in which one was easy/Medium (20 Marks) and other was medium/hard level (50 Marks).

My first question was to go through array and keep adding all values till you reach target. My second question was to count unique values for each testcase .

Round 2 (Technical + HR Interview):

The interview was conducted on Teams. I wasn't asked any other HR questions. My Interview started with questions like

1. Introduce yourself.
2. ACID properties in DBMS.
3. Difference between DDL and DML.
4. What is normalization?
5. Why java is called platform independent?
6. What is data encapsulation?
7. What is JIT compiler?
8. What is final keyword?
