

Name: Suraj Moolya

Class: D20B

Contact : 9833042324/ 2019suraj.moolya@ves.ac.in

Company: carwale

Package : 7.5 fixed + 1.5 yr retention bonus

The entire process took place in two days

Day 1:

Online coding round :

Four coding question will be given in this. 2 easy +1 medium + 1 hard. Time limit is of 2 hours. Score will be given based on number of questions passed. Weightage of ques is hard>medium>easy. Top scorers will move on to the next round. I have only solved a medium ques and all my public test cases was passed. I have not attempted any othe ques and was able to clear the round

Day 2:

It will be a long day, so buckle up for it.

Coding interview round:

Coding problems will be asked and you will have to provide the logic and algorithm with lowest time and space complexity. You will have the code for the same in paper. I was asked two problem,

Return the element in the array which is greater than it's neighbour.

Push all 0 elements to the end of the array.

System deslgnig round:

In this either they will give the own hypothetical project or will take any of your project. You will asked question regarding scalability and different problem associated with it.

Some examples are:

How will you handle load on the server.?

What will you do if you have multiple like request for the post creating load on the serve?

There is nothing right or wrong in this round, it's just how you handle different scenario. So do engage in healthy discussion with your interviewer.

Recommended that you prepare about load balancing, ddbms, etc and answer using the terms Associated with it.

Hr round :

If you have reached till here be confident, you are selected. During our time no one was eliminated in this round. Mostly hr questions will asked so take it easy
