Eligibility	Aggregate 60% or CGPA of 6.5 and above and no active backlogs
Placed	Yes
Role offered	Analyst

Recruitment process -

<https://usrecruiting.deloitte.com/campus-hiring-e-school2>

Registrations started from 18th August 2021.

The entire process was held online for the 2023 batch.

Round 1 - 23th August 2021

Aptitude test of 3 hrs conducted through AMCAT(refer previous year questions)

3 sections -

English Comprehension - easy to moderate

Logical Ability - easy to moderate

Quantitative - moderate

The test was section wise like first you have to complete first section then you can proceed with the next section and same implies with the questions like in first section first you solve 1 question after submitting that question then next question will appear (for further process like how platform works you can also search on google before giving test so you will get idea)

134 candidates were shortlisted for Analyst Role and 16 students for Cloud Engineering Profile.
26th August 2021

Pre placement talk was before the interview for shortlisted candidates in the morning.

Round 2 - 26th August 2021

Interview(Technical + HR) 20 to 30 mins

Interviews started at 10.50 am. Mine was at 12.30 pm.

Questions were different for different panels. My panel interviewer asked me to code 4 questions whereas some were just resume based and HR questions.

- 1) Tell me about yourself (Mention projects you really have worked on)
- 2) Code for 4 simple DSA problems(I did in python on an online compiler while explaining my approach)
- 3) I discussed with him about concepts used while doing the code.
- 4) Why Deloitte?

Interviewer asked me if I had any questions so I told him that I want to ask him one question: what advice would you give to a fresher who is at the beginning of his career?

At 6 pm, the selected candidates were called on zoom and informed that we were selected.

Total students placed - 64 for Analyst and 5 for Cloud Engineering

IMPORTANT:

- 1) Do the basics well (You shouldn't be oblivious to basics like OOPS, DSA, DBMS, etc)
- 2) You should be able to answer questions about everything you put on your resume

(Some panels like to dig deep on these things so study thoroughly about everything you put on your resume. Even if you haven't the projects yourself you should be able to answer the questions)
- 3) Be confident (Confidence is trait many look for)

4) Try to match the vibe of your interviewer(most interviewer are casual and if you can put them in a good mood you have a high chance of being selected)

5) Ask for blessings from your elders or pray to your GOD (Luck is also a deciding factor in placement. Some panels go easy just like chatting with you the whole interview while asking basic HR questions while some panels ask hard or tricky questions which are above the average line and even if you give them more than 70% right answers you are not shortlisted.)

Mostly the aptitude questions are repeated from previous years. Be well prepared with each and every part of your resume. Mention only the projects you are really familiar with. The overall process was very easy and maximum students got placed. You can also connect with your panel via linkedin to gather information about them.

If you have any doubts or queries, feel free to contact me.

ALL THE BEST!!!
