The process was hybrid for the 2024 batch.

Round 1

(26th August 2023; online - HirePro)

Aptitude test of 90 mins conducted on HirePro platform(refer previous year questions)

Total 5 sections were there-

Sections	Questions	Time (mins)
Verbal Ability	13	13
Reasoning Ability	12	12
Quantitative Ability	10	10
Technical	30	30
Coding	2	25

The test was conducted section wise. You could switch to any question in a particular section but you can't switch between sections.

For preparation, you can refer to [Indiabix](#) and [PrepInsta](#) and RS Aggrawal. For technical questions cover topics C, C++,Java, Excel, SQL, HTML, and a few questions on MS office, Cloud Computing

One of the crucial things in this test was your ability to time management. Each section was allocated a time limit. There wasn't a n overall time to the test but rather for each section.

66 candidates were shortlisted after the first round.

Pre-Placement Talk(PPT)

(1st September 2023; offline - auditorium)

The pre- placement talk was conducted in the auditorium of our college. Unlike other companies the pre-placement talk was only conducted for the 66 shortlisted students.

The pre-placement talk is very important for every candidate. Some of the students were asked a few questions in their interview from the PPT.

It makes a good impression if you ask questions in the QnA part of the PPT.

Round 2

(1st September 2023; offline - labs)

We were asked to carry a hard copy of our resumes. After the PPT, we gathered in the amphitheater and were asked to submit our resumes to the p-cords. After that all the candidates were randomly assigned to one panel. There were several panels arranged on the 2nd floor labs.

Interviews started at around 12.15 am. I was the first candidate in my panel. This was a huge advantage for me as the interviewer was in a fresh mood.

My Interview started with a basic introduction, I gave my introduction in about approx 1.5 mins. The interviewer could sense that I was nervous in the beginning and offered me water to calm down. It's okay if you are nervous, the interviewer understands that you are still a student and new to interviews.

After my introduction, he went through my resume and started asking me questions regarding my projects, internships and the skills I had mentioned in my resume. The interview was fairly focused on my resume only.

I was asked to write an sql query for a problem that he posed.

Q. There are 2 tables, Books(columns: book_name,book_id) and Authors(Author_name, book_id). Retrieve all the names of the books written by author 'X'.

First I told him that I would solve this problem and then wrote the query.

Q. I was also asked to write a program to reverse the elements in a given array. He gave me the option to write in any language. I chose python. I was explaining the code as I was writing.

Since I am from AI&DS department, my resume was fairly filled with AI and ML related projects. The interviewer then asked me,

Q. If I was offered a job by a different company in my domain and a role of consulting analyst at Deloitte(the role I was interviewing for), which would I choose and why?

For such questions always answer that you'd choose the company that you're interviewing for, no matter how hard the interviewer tries to twist and turn his question and your answer.

At last, end the interviewer by asking a question to your interviewer.

First I had asked, *What tech stack would you suggest a fresher like me to develop or improve before joining the company, if given the opportunity?*

This has opened a discussion between us Hence I asked another question after taking the interviewers permission, *What's your favorite part about working here?*

All the candidates were requested to stay back till all the interviews were completed. After that, around 5pm results were announced on the amphitheater's stage. They called all the placed candidates 1 by 1 on the stage. It was a very overwhelming experience for everyone.

Total students placed - **29 for Consulting Analyst**

Be well prepared with each and every part of your resume. Mention only the projects you are really familiar with. The overall process was very easy and maximum students got placed.

If you have any doubts or queries, feel free to contact me.

ALL THE BEST!!!
