

# Deloitte.

## Sheetal Dixit

Batch 2020-24

AI-DS

# Recruitment Process

Job role offered: Analyst- Deloitte USI Consulting

Total Rounds: 2

1. Online Aptitude test- Quantitative+Verbal+Logical Reasoning+Technical MCQs and 2 Coding Questions
2. Interview- Included Both Technical and HR questions (Offline in campus)

469 students registered for Deloitte and appeared for the Aptitude test. 66 were shortlisted for interview, 29 were placed.

# Round 1

Round 1 was an online test, held on HirePro platform.

The test included Quantitative Ability, Logical Reasoning, Verbal Ability, English Comprehension, Data Interpretation, Technical Questions (Java, Python) and 2 coding questions.

Difficulty level was easy to moderate.

Strategy:

- 1.High attempt and accuracy rate
- 2.Do not waste time solving very difficult questions, move on and return to the question later if time permits
- 3.Sectional cutoffs

# Round 2 - Interview

1. Introduction - Prepare your introduction well
2. Projects - Why, What alternative etc
3. Internships - Mention overall learning and experience
4. Why AI-DS/What made you choose AI-DS?
5. Why Python? Since most of my projects were ML based
6. Some Basic Java questions - Refer Javatpoint
7. OOPS with examples
8. SQL Basics
9. Extra Curriculars are important too
10. Very conversational, my interview was 30 mins long.

# Important

1. Resume - Novoresume has good templates
2. Communication skills
3. Role dependent, research about the role well
4. Weak projects- It is okay to not have very complex projects, but its important to explain them with clarity
5. There will be rejections, but do not lose hopes
6. Language preference
7. How important is DSA for Deloitte esp?
8. Don't compare yourself with others, your journey is unique
9. Important to show them that you have a dynamic personality
