

Deloitte Placement Experience Batch 2020-2024

Name: Sheetal Dixit
Class: D16AD
Department: Artificial Intelligence and Data Science
Email id: 2020.sheetal.dixit@ves.ac.in
Company: Deloitte USI Consulting
Status: Dream
Location: Mumbai
Role: Analyst
CTC: 7.6 Lpa
Job Offered: Yes

About Deloitte USI: Deloitte is one of the Big 4 firms. The Big Four are the four largest professional services networks in the world.

Deloitte US-India Offices (USI) is an entity of Deloitte US that is geographically located in India and caters to clients of the US member firm, whereas Deloitte India caters to clients within India only.

Deloitte is a leading global provider of audit and assurance, consulting, financial advisory, risk advisory, tax, and related services. If any of these areas excite you, give your best in this recruitment process.

Only Deloitte USI Consulting came for recruitment at VESIT for 2023.

Eligibility:

1. All Branches of BE + MCA were eligible
2. Aggregate 60% or CGPA of 6.7
3. No live KT

Total Rounds: 2

1. Online Aptitude test- Quantitative+Verbal+Logical Reasoning+Technical MCQs and 2 Coding Questions
2. Interview- Included Both Technical and HR questions (Offline in campus)

Timeline:

- Round 1- Proctored online test date on 26-Aug-2023
- Round 2- Interview on 01-Sep-2023

469 students registered for Deloitte and appeared for the Aptitude test.

There was only one job role offered: Analyst - Deloitte USI Consulting

Round 1

Round 1 was an online test, held on HirePro platform.

The test included Quantitative Ability, Logical Reasoning, Verbal Ability, English Comprehension, Data Interpretation, Technical Questions (Java, Python) and 2 coding questions.

Difficulty level was easy to moderate.

Your strategy should be to attempt as many questions as possible, and solve them accurately, as most tests include negative marking. If there is a slightly difficult and time-consuming question, do not waste time solving it immediately, instead move on and return to the question later if time permits.

Some students attempt the coding questions correctly with all test cases passing, but they don't get shortlisted because they are not able to score much in the MCQ's of other sections, and vice versa. There could be sectional marking as well. So, make sure you perform equally in all the sections.

The only challenge was Time. All sections had a time limit and we couldn't switch sections in between. It is a race against time.

Coding questions:

Q1. Find the maximum difference between any two elements in an input list.

Q2. Take a square matrix (a matrix with the same number of rows and columns) and replace each element with the largest multiple of 5 less than or equal to the original element.

We could code in any preferred programming language.

66 students were qualified for the interview

11 from AI-DS, 29 from CMPN, 16 from INFT, 4 from ETRX and 6 from MCA.

Round 2

- This round was held offline in the college campus, on 1st September, 2023
- The process started with Pre-placement talk at 9:30 am
- The interviews started at around 12:30 pm
- All the students were divided into different panels

My interview started with the interviewer asking me to introduce myself.

I was asked about my branch and what made me choose AI-DS.

The interviewer thoroughly went through my Resume and asked me to talk about my 2 most favorite projects out of all the projects that I had mentioned in my resume.

During this discussion, there were follow-up questions regarding the algorithms I used, the reasons for my choices, and possible alternative approaches etc.

My projects were inclined towards ML, so most of the questions were related to the same.

It's important to have an end to end understanding of your projects and be prepared for expected questions.

Then I was asked about my Internships, in which I mentioned my learnings and overall experience during the internship. This provided an opportunity to highlight how I adapted to new environments, interacted with various individuals, demonstrated a willingness to learn, and stepped out of my comfort zone.

Questions asked on OOPS - Explain Abstraction, Encapsulation, Inheritance and Polymorphism with examples of each, Overloading, Overriding etc.

SQL- Join, Basic query on joins, Constrains, Delete vs Truncate etc.

Extracurricular and Cocurricular activities mentioned in my resume were asked. This can be a good opportunity for one to highlight other aspects of one's personality and how those skills and experience differentiate them from all the other candidates.

Next the interviewer asked me what I knew about Deloitte and what the company does. Make sure to pay attention during the pre-placement talk.

Then he asked me if I had any other questions for him. Keep a question prepared beforehand and do not ask something that had already been covered in the ppt. The interviewer might like it if you ask a unique question which might show your curiosity and excitement about the company.

My interview lasted for about 30 minutes and was very conversational.

Results were announced around 5:30pm on the same day, offline in campus itself.

29 were placed, from which

5 were from AI-DS, 13 from CMPN, 8 from INFT, 1 from ETRX and 2 from MCA.

Useful resources:

- Aptitude questions: IndiaBix, RS Agarwal
- Java questions: JavaTpoint and Kunal Kushwaha (on Youtube)
- DBMS and SQL: Gate Smashers (on Youtube)
- DSA: Leetcode and GFG

These were the resources that helped me in my placement preparation.

Important tips to remember:

1. Communication skills are extremely important, especially for consulting firms like Deloitte or even EY.
2. Even if your projects are basic, make sure you are able to explain yourself well clearly.
3. When asked about internships, include academic learnings as well as other experiences. For example, tell them how you adapted to a new environment, how it opened a door of curiosity etc. This will help in portraying a dynamic personality.
4. Keep the basics of OOPS, SQL, Java prepared well.

5. Include only the things that you are absolutely confident about in your resume.
6. Everyone has some strengths, make sure you highlight them.
7. Try to be as natural as possible, do not give repetitive internet answers, especially during HR questions.
8. Try to match the energy of your interviewer, and be confident.

Do not lose hope if you don't make it into a particular company, you will have many opportunities.

Believe in yourself and focus on how you can emphasize your areas of strength in the best possible way.

ALL THE BEST
