

Name:- Adarsh Panigrahi

Department :- INFT

Package :- 14.5LPA (8 lakh fixed + 1 Lakh variable + 5 lakh Retention bonus)

Job Role :- Strategy Developer

Job offered :- Yes

Job Location :- Andheri

LinkedIn :- [Link](#)

Eligibility Criteria:-

- CGPI ≥ 7
- 10th & 12th, diploma $\geq 65\%$
- No live ATKT
- Branches Eligible: BE(CMPN, INFT only)

Interview Process :-

1. Programming Test (Based on C/C++) Time :- 90min
2. Final Round : Technical Interview
3. HR Round

Description:-

The whole process was conducted 2 day long.

Day 1:- Programming round

Day 2:- Technical and HR round.

Round 1 (Programming Test):-

There were a total of **2 questions**. The questions were **based on real life scenario** first question of based on queue and next question was based on priority queue

Question 1:-

Given 2 Structure

```
struct EventStatus{
    char eventType; // 'S'
    char responseType // 'P', 'M', 'C', 'T'
    Int count;
};
```

```
struct RequestStatus{
    char eventType; // 'R'
    Int count;
};
```

You have to perform 2 operations: push and pop.

push() :- push all the elements

pop() :-

- pop all the elements from EventStatus where responseType should be 'P' and 'M' for responseType 'C' or 'T' pop only when count > 2 otherwise increment their count by 1 push to the queue.
- pop from RequestStatus when the previous responseType is 'C' or 'T' otherwise push to the stack with count incremented by 1.

Eg :-

Input	Output
S,M,0	R,1
R,0	S,C,2
S,C,0	S,T,2
R,0	
S,T,0	

Question 2:- I don't remember but it was based on priority queue

Results of Round 1 were announced at night 9.30pm from 100 students only 15 got selected in Technical and HR Interview.

Round 2 (Technical Round) :-

They first asked me about my project for 2 min and started by asking about the concepts of C++ and DSA. (Mainly based on Link List, Stack, Queue, Heap)

1. Do empty class get compile ? If yes then how?
2. What is a copy constructor and how to implement it?
3. Concepts on OOPS
4. What is abstraction and how do we implement it in C++?
5. How to call child function and parent function of same name using Child class as reference?

Ans {Here we have to use the concept of Virtual function }

6. What is a Pure Virtual function? Why do we use it?
7. What is the difference between new vs malloc vs calloc
8. Many questions on Pointer and memory allocation in C++
9. What are double pointers?

DSA Questions:-

[Reverse Link List](#)

[Remove Nth Node From End of List](#)

[Detect Cycle From Link List](#)

[Valid Parentheses](#)

Do questions on LinkList, Heap, Stack, Queue and array traversal the ask these topics a lot. Do questions on LinkList, Heap, Stack, Queue and array traversal the ask these topics a lot

Round 3 (HR Round) :-

What do you know about Dolat Capital?

What is your family background ?

Where do you stay?

Are there any queries regarding the company?

I asked 3 questions

1. What is the timing of the company
2. Does the company provide any course like Blockchain if an employee wants to study it so that it would be beneficial to the company project?
3. What are the projects you are working on?

Dolat Capital take the average marks of Technical round and HR round and then they announces the result

Tips:-

1. Be Honest, Humble and Confident in the interview. If you don't know something tell directly you don't know because points will be deducted if you bluff. If you don't now the answer then tell them so that they can give some hints or some other questions.
2. For coding questions try to make the code modular if possible explain the code visually to the interviewer it would increase your marks in Technical round.
3. Make use of comments in Round 1 and variable names should be logical.
4. Practice Pointers and Memory allocation on GFG

Study Materials:-

For DSA :- [Striver SDE Sheet](#) [Love Babbar SDE Sheet](#)

For Pointers and Memory Allocation :- [Link](#)
