

Name: Himanshu Mishra

Department: INFT

CGPA:9.36(Avg upto 5th sem)

Job role: Junior Analyst(SQL and application developer)

CTC offered: 13 LPA(fixed)

Job Offered: Yes

Date:25/07/2022

Job location: Goregaon, Mumbai

Eligibility Criteria:

No Live KT

CGPA>=9.0

Rounds:

- 1)Technical +Aptitude Test(18 java + 17 python+ 5 sql + 30 aptitude)
- 2) Technical Round
- 3) HR round

(All the rounds were conducted in offline mode)

Technical +Aptitude Test:

The test had questions related to java, python sql and aptitude. Aptitude questions were based on logic rather than formulas. Java questions were based on oops. Sql had questions related to select queries and some theory question. This round was most important round since in this round only 29 were selected out of 251.

Technical Round:

(It started approx. 2:30 and my interview was around 6:00)

Interview started with the question based on my first preference which was SQL,

- 1) What is left join?
- 2) Is left join and left outer join same?
- 3) What do functions in SQL return and what do procedure return?
- 4) I was asked to write query on paper with which I did using self join and nested query(it was of medium difficulty)
- 5) Will you be comfortable with application development as well?(I replied yes as it was my second preference)
- 6) What is static variable?
- 7) I was given an situation where he asked if I login and changed static variable username on the application to xyz and again you logged in and changed it to Himanshu now again if xyz login into the system what will be the username displayed? (answer is Himanshu)
- 8) How many relations are possible between two classes?

- 9) Is order maintained when we insert in hashmap?
- 10) Can we insert objects in the hashset?
- 11) How can we check if the username is already present in system before insertion of every new object?
- 12) What are the technology stack you have worked on?
- 13) I was asked question on how I established connection with database in one of my projects based on java?
- 14) Can we declare static variable in a non-static method?
- 15) Do interface and abstract class have constructor?
- 16) If yes, then how are they called, because we can't make their objects?
- 17) Why do we use final keyword?
- 18) What do you know about ISS?
- 19) Any Question for us? (As senior's always say ask some question I asked what feedback would you give to me to improve myself? And what do ISS expect from a fresher?)
(I was able to give answers to almost all question asked and was subsequently selected for hr round. For this round focus on SQL and OOPS as it will help for this as well as other companies.)
(12 were selected after technical round)

HR round:

(My HR round started at 9:20pm)

- 1) Tell me something about yourself?
- 2) Where do you stay?
- 3) What is your family background?
- 4) How'll you travel from airoli to Goregaon?
- 5) What are your long term and short term goals?
- 6) Are you comfortable with this role?
- 7) How was your day?
- 8) Any question for us?

Result was declared on the same day at 10:30 pm all 12 were selected (6 comps, 6 IT).

Tips:

- Focus on DSA, aptitude, OOPS and SQL as it will help you for this as well as other companies, be thorough with the basics of OOPS and SQL.
- For aptitude focus on building your logic as it will help you to solve the problems which you have never encountered before.

Feel free to connect for any queries, all the best.
