CTC – 8+2 LPA (confirmation bonus)

Location: Mumbai

Overall Process

There was no test conducted but the college had sent a database to the company and then they shortlisted students It was basically a Resume based process.

53 were selected for IT roles and rest 32 got shortlisted for other role overall 85 were shortlisted for interview rounds.

There were 2 rounds in total, the first round was tech round and 2nd round was Hr interview

But for me in both rounds, they asked me tech as well as HR questions

First round took approximately 45 mins in which they asked questions about my Resume, which included my personal projects, college projects, hackathons, and internships. Along with that I have also done one Research paper and they asked me alot of questions related to that.

The questions were mainly on the tech stack used, and it was on python. They also asked me about web technologies used in my internships it was on React and Django frameworks.

Along with that, they asked me these questions as well including SQL and NoSql.

Do you have knowledge of share market

In Second Round, there was only one Interviewer and it took nearly 20 mins, in which they asked me some technical questions along with some introduction and personal questions.

Apart from that he also asked me if I am comfortable with frontend or backend and on a scale of 10 how much do you rate yourself in Frontend, Backend and Database technologies.

BEST OF LUCK
