1) Java Developer- Tech. (Software Developer)

2) Flutter Developer- Application Developer

3) IT profiles - Special Projects

CTC – 8+2 LPA (confirmation bonus)

Location: Mumbai

Selection Process:

The company shortlisted the whole batch according to one's resume and 53 students were shortlisted for IT role.

There were two interview rounds out of which the first one was a technical interview focusing on basic OOPS concepts and coding logic. The round took around 30 mins and there were question around C++ language and its basics as it was my chosen OOPS language.

The second round was a detailed one where the official asked me about my projects in the resume. Even asked me for an explanation of a full stack project which was hosted on Heroku. I had worked with an API so he even asked me about how I fetched the data as I was doing it through JavaScript.

These were the two rounds that I went through and at the end of all rounds 8 candidates were selected for jobs in IT role at a CTC of 8 LPA with 2 lakhs of additional confirmation bonus.
