Services and Vision

Software

It all started with the creation of powerful software to simplify our clients' operations. Developed by our teams of engineers at the forefront of the latest scientific and technological advances, our end-to-end, modular software platforms are cloud-ready, highly scalable, and have the speed of development and continuous delivery at their core.

Data and analytics

Our data management and distribution services let you efficiently source the right data for your needs from multiple sources, with no redundancy or overbuying. Our artificial intelligence and machine learning platforms provide unique insights into operational risk and help you develop effective mitigation strategies.

Services

Our services provide human intelligence that makes it possible to make the best use of software and data. Linedata's highly skilled service professionals can deliver results and perform key operational roles within extended teams, offering you greater resilience, scalability, and efficiencies.

Caring

our ethical mindset is open and warm, we're a partner with a generous team spirit. We're direct, simple and geared to collaborative service

Smart

we use intelligence to drive ethics forward, we use our expertise, we're elegant, premium even - but even more, we're inspired by innovation

Sustainable

ethics in business means a great deal to us and we invest in long term relationships by being transparent, honest, serious and highly trustworthy

Passionate

above all, we're known for our ethics in action: our passion - stimulating us to excel, to commit, rising to a challenge and reaching our ambitions

Job Details

Role offered : 1.) Innovation Lab Engineer
2.) Engineer Advisory
3.) Systems Admin

Opportunity : Full Time

Compensation : 4-6 LPA (Depending upon Candidate)

Location : Vikhroli West, Mumbai

Working Hours : UK Shift (1pm to 10pm)

Working days : Mon - Fri

Working Mode : Hybrid, 3 days work from home

Selection Process

All Rounds were taken in their office premises.

Round 1 - Aptitude Round (Pen and Paper)

- **Quantitative Aptitude** : Time Speed Distance, Time and Work, Percentages, Averages etc.
- **Logical Reasoning** : Non Verbal Analogy, Calendars, Statement Conclusion, Cause and Effect, etc.
- **Technical Questions** : Theoretical MCQs on SQL , Java, C++ , Data Structures
- **Coding Questions** ; 2 easy to moderate difficulty level coding questions were asked, you could code in any preferred coding language (For me it was 1. Recognising a Palindrome and 2. Printing any input in reverse, I coded in Python.)

Duration : Around 30 mins for 25 questions. Out of 50, 15 candidates were retained at the end of this round in our batch

Selection Process

Round 2 - Technical Round 1

- Started off with Basic introduction and project related questions. Resume based Questions were asked, what why and how i used my tech stack in my projects.
- Interviewer asked me to review my code I wrote in the previous aptitude round and i was asked to optimize it and explain all the suitable logic to him.
- Questions on SQL : Difference between union and joins, different types of joins, need of a left or right join when both operations can be performed using only one of them. DCL Commands syntax.
- Questions on Python : OOPS concepts in python, different access modifiers, Django concepts.
- All tech questions were asked on tech stack mentioned in my resume.

Duration of Interview : Around 45 mins. Out of 15, 7 were retained for Round 2

Selection Process

Round 3 - Technical Round 2

- Started off with Basic introduction again and post this interviewer asked to code python code to print inverted pyramid of letters.
- One more similar python code was asked(Swapping values without variable)
- SQL Query which used nested query and subquery was asked
- How would you rate your performance.

Duration of Interview : Around 25 mins. Out of 7, 3 were retained for CTO Round

Selection Process

Round 4 - Round with Chief Technical Officer (CTO)

- This Round happened online(due to unavailability of CTO) after 2 weeks declaration of Result of Previous Round
- Interview was entirely Resume based, interviewer went deep into projects done, asked pros and cons of working on that specific technology and asked it to compare it with other similar tech.
- Learnings from Projects and Internships were asked.

Duration of Interview : Around 15 mins.

Out of all the people from all the batches, 5 were offered by Linedata for the role of Engineer Advisory at 6 CTC

Suggestions and Tips

- Prepare and Practise Aptitude well.
- Keep revising the Basics like OOPS, CN, Programming Languages and Data Structures.
- Obviously - 'Practice DSA'
- Be honest in the interview, dont try to bluff about any concepts. Take your time and try to answer questions accurately. Always convey your thinking process to the interviewer even in the cases in which you dont know the answers
- Have a sense of dispassion while attending the interview, this will increase your presence of mind and confidence.
- Placement doesnt happen solely on the basis of luck or skill, it requires a bit of both.
- Internships and Projects on the resume are important for placement.
- Thoroughly research the companies/interviewers that you are gonna face and curate your resume/answers on that basis.

THANKYOU !
