Rounds:

Process was divided into 4 rounds. First was the aptitude test, second was coding round, third was Verbal Communication Assessment test and final round was interview.

First round : (Technical and cognitive assessment)

The test had questions that were well within the specified syllabus. There were well-distinguished sections and each section had few moderate level questions while most of them were easy.

The duration of the Cognitive & Technical Assessment Test will be **90 minutes**, where you will face **90 questions**. There is **no sectional time limit**. See all the details below:

Section	No. Of Questions	Important Topics
English & Verbal	20	Paragraphs, Synonyms, Antonyms, Comprehension reading, Plural nouns, Odd one out, One-word substitution
Logical Reasoning	20	Coding-Decoding, Statement, Argument Syllogism, Cause, and effect, Venn diagram-based questions, Next number in series type
Quants	20	Profit and Loss, Height and Direction, Work and Time, Trigonometry, Simple and Compound interest, Percentage

Technical	30	Pseudocode - Output-type questions using C language like functions and pre & post-increment/decrement. 8 to 9 Questions on: Basics of MS Office (Excel, Word, Outlook), Extensions of file types, Commands and shortcut keys for performing certain operations
-----------	----	---

If you cleared this round then you have to give the coding test immediately.

Second Round: (Coding Round)

The coding test consisted of 2 questions that were of moderate difficulty. The time duration for this test was 40 minutes. If you have sufficient coding practice, completing both the questions within the specified time limit won't be a problem. Liberty to code in any language: Python, Java, C, etc.

Third Round: (Verbal communication assessment)

This round was there just to judge how well you can speak, your pronunciation and how much you can recall.

For example:

1. They will give you one sentence on the screen and you have to read it.
2. They will tell you a short paragraph and you have to recall as much as you can
3. They will tell you a sentence in a jumbled order and you have to frame a sentence
4. Fill in the blanks

Mic of good quality is a must for this round.

Final Round: (Interview)

Questions asked were:

1. Introduce yourself.
2. Asked about internships.
3. Tell me about your projects in detail.
4. Asked about family background
5. Asked about difficult subjects during engineering
6. Asked about subject which I liked during engineering
7. Any questions about Accenture?

27 students were shortlisted for Accenture from VESIT
