CGPI: 9.06

Job Offered: Yes

Role Offered: Assistant System Engineer-Trainee in Grade Y

Job Location: Not Specified

Email : vaibhavijadhav2707@gmail.com

Contact Number : 9082717571

Rounds:

Process was divided into 3 rounds. First was the aptitude test and coding round, second was technical interview and final round was HR interview.

First round : You are supposed to download and test a software communicated via mails through the company.

Part	Section	No. of Questions	Duration
A	Verbal Ability	24	30 min
A	Reasoning Ability	30	50 min
A	Numerical Ability	26	40 min
B	Programming Logic	10	15 min
B	Hands-On Coding	2	45 min
Total		92	180 min

codequotient

The test aptitude questions were quite difficult and time consuming.

You can't toggle between questions and sections.

The first coding question was easy while the second was difficult.

The interface is not user friendly, my system was abruptly shut down on the first coding question which was easy, when I restarted the system it took me directly to the second question and I couldn't attend the first question. I didn't answer any coding questions therefore.

I was selected for the ninja package hence.

Second Round: (Technical Interview)

Questions asked were:

1. Introduce yourself.
2. Tell me about your projects in detail.
3. Demonstration of the project by presenting it
4. Managerial questions like how will you ensure that your team members are working
5. If I am willing to relocate

Final Round: (HR Interview)

Questions asked were:

- Introduce yourself.
- Strengths, Weaknesses
- Why TCS?
- Family Background
- Verification of educational qualifications
- If I am willing to relocate

16 students were shortlisted for TCS from VESIT
