

## **VECTOR CONSULTING GROUP PLACEMENT EXPERIENCE**

**NAME:-** Simran Purshottam Bhoneja

**EMAIL:-** 2019simran.bhoneja@ves.ac.in

**BRANCH:-** INFT

**JOB OFFERED:-** YES

### **COMPANY DESCRIPTION**

**Name Of The Company:** Vector Consulting Group

**Company Status:** Dream

**Eligible Branches:** BE (CS / INFT/ETRX/EXTC), MCA

**Eligibility Criteria:** No cutoff criteria, No live KT

**CTC:** 6LPA ( Fixed 5.1lacs & Variable .90lacs)

**Work Location:** Thane

**Date of Drive:** 28<sup>th</sup> March 2023 (Pre-Placement talk + Technical Test + Technical Interview)

The entire process was conducted in college, offline.

Something that I would suggest before sharing my placement experience:

- Take every opportunity as if it is your last opportunity.
- Don't waste your vacation period resting, binge-watching, etc kind of stuff. Utilize your vacation in preparing for the placement as you've to concentrate on both SEM 7 as well as the Placements.
- Don't lose hope, things will go your way but in some cases, it's going to be fast and in some cases, it's going to take a lot of time. (My example suits the best here, some of my friends got placed in starting companies only, while some of us were struggling. I myself was rejected by 56 companies and got placed in the 57<sup>th</sup> company that came to our college that is VECTOR.)
- Last but not least "TIME CHANGES FOR EVERYONE, KEEP TRYING AND NEVER LOSE HOPE!"

Now comes the placement experience:

The company blocked the selected students hence they were out of the placement process and could not go for higher studies for the Academic year 2023-2024.

**There were 2 rounds:**

- 1) Aptitude (MCQs + Coding)**
- 2) Technical Interview**

The pre-placement talk started at -**10:15 am** and went on for 15 to 20 minutes after that the first round started at -**10:45 am**. The first round lasted for **90 minutes**.

## ROUND 1: APTITUDE

**90 students** appeared for the test

The mode of conduction was on the **DoSelect platform**

The aptitude consisted of a total of **28 questions**

The aptitude round consisted of **2 sections**

### 1. MCQs

- a. Total **25 questions**
- b. Quants
- c. Logical
- d. Errors
- e. Read the paragraph and answer the questions
- f. Other generic questions

### 2. CODING

**3 coding** questions were there

- a. Lucky Array
- b. Decoded String
- c. Even-Odd Scenario

Aptitude **results** were out by **-1:08 pm**

Out of **90** applicants, **10** were shortlisted for the next round

## ROUND 2: TECHNICAL INTERVIEW

The interview started at **-1:40 pm**

- a. The interview started with introducing yourself.
- b. Interviewers asked me about the projects that were mentioned in my resume, and questions about BE project
  - i. Why this project?
  - ii. The most challenging part, etc
- c. Then they asked me questions based on skills, and internships mentioned in the resume.
- d. Some questions on SQL like what is SQL join, types of SQL joins, what is aggregation, etc.
- e. They asked me for 2 puzzles
  - i. Well and frog (There's a well having 30 steps. A frog is at the bottom of the well he needs to come out of the well every time he makes a jump he moves 3 steps ahead and falls 2 steps backward. So how many jumps he needs to make to come out of that well?)
  - ii. Pick the highest-weighing ball (There are 8 balls each ball exactly of the same color, size, etc but the weight of 7 balls is the same suppose 1 unit and the

weight of the last ball is 0.1 extra suppose 1.1 unit. Now you've to pick a ball whose weight is the highest how will you do that?)

- f. After this, they questioned me on the test that I gave in round 1 some aptitude questions, and all the coding questions were asked.
- g. Basics of Python were also asked.

The interview lasted for approximately an hour.

Results were out on **31<sup>st</sup> March 2023**. Out of **10 applicants**, only **1** was shortlisted.

### **ADDITIONAL TIPS:**

- Focus on resume building.
- Practice aptitude and coding as much as possible. Solve as many questions as you can that will help you clear the first round and if that is done there are chances that you will be selected for the company. (Basic coding questions whose level of difficulty is easy and medium, high-level difficulty questions aren't asked much)
- Solve puzzles.
- Keep your basics strong.
- LUCK plays a vital role. So don't get disheartened after the results, as it's not always your fault. It's just that give your 100% and don't worry about the results.
- **BE CONFIDENT.**
- **DON'T LOSE HOPE** as it's said that **"WHERE THERE'S A WILL, THERE'S A WAY!"**.

**'ALL THE BEST FOR YOUR INTERVIEWS!'**
