

Willis Towers Watson Placement Experience
(Dept: CMPN / INFT)

Name: Bhavika Bulani

Class: D20A

CGPI: 8.86

Job offered: Yes (6 LPA)

Company website: <http://willistowerswatson.com/>

Email : 2019bhavika.bulani@ves.ac.in

The company offered following 3 roles:

Quality Assurance (testing - Manual /Automation)

Development

Service Management and other SCRUM teams

The role will be given after student's performance during training period

The placement drive consists of 2 rounds:

1. Aptitude test (No negative marking)

- **Passage questions:**

There was a passage and per question 30 seconds time was given. Total 4 questions.

The questions were some sentences from the passage, contextual meaning of some words from the passage, etc.

- **Graph based questions:**

In questions graphs or pie charts were given and questions were asked based on the data in charts. This category also had 4 questions and 30 seconds time was given per question.

- **Error checking:**

This category had 8 questions and 15 seconds time was given per question.

Each question contained a reference table and 4 tables in options from which you had to

select tables containing error. There can be multiple correct options for such questions.

This test was conducted on Saville Tests and before the actual test there was also a practice test where you can practice the test as much as you can but the difficulty level varies from the actual test. Give practice test to check the time you take but remember, final test will not be of same level. We were given 1 ½ days to give the test.

After this round they shortlist the students based on the test given for the next round which is (technical +hr)

2. Interview (Technical + HR) round (Duration: 1.20 hr)

So after shortlisting they informed us that the interview was offline and we had to reach their office at 10:30 am at their Thane office.

After reaching their office there was a small induction for the introduction of the company and so on . Later the interview process began

Questions asked in Interview :

1. Give your Introduction.
2. Tell me about your projects
3. Specific Questions on BE Project (Prepare this well)
4. Which was your fav subject (so i answered DBMS)
5. Questions regarding DBMS :
6. What is schema , architecture of DBMS , Views , SQL Queries (Prepare this well). How did you use DBMS in your projects , primary key, foreign key concepts
7. Next the interviewer gave me two problems to solve
 - a. <https://www.geeksforgeeks.org/rearrange-a-linked-list-such-that-all-even-and-odd-positioned-nodes-are-together/>
 - b. <https://www.geeksforgeeks.org/python-get-unique-values-list/>
8. Explain the technologies and architecture you used in that project
9. After this the interviewer asked : Why do you want to join WTW

10. Next do you know about the competitors of WTW

11. Next Do you have any questions : I asked about his working experience in WTW and what made him stay in the company. After this the interview got over and results were declared the same day in the office itself and 4 students were selected . 3 were from INFT and 1 from CMPN

TIPS :

1. Prepare the aptitude well using RS AGARWAL AND INDIABIX
2. Prepare DBMS,SQL,OS JAVA WELL FROM GEEKS OR YOU CAN ALSO REFER THE YOUTUBE CHANNELS. FOR JAVA YOU CAN REFER TELUSKO .
3. Practice coding question
4. BE frank in your interviews and don't bluff
5. In the end GIVE YOUR BEST!!!!!!.
