PROFILE

Dynamic engineer specializing in technology solutions, adapt at designing role-based web platforms with automated testing frameworks. Focused on driving innovation in application development and delivering exceptional results, enhancing decision-making capabilities through advanced technologies and global collaboration.

EDUCATION

Bachelor of Engineering
Vivekanand Education Society's Institute Of Technology (VESIT)
2021 – present
CGPA - 9.18/10 (Till SEM VI)

Higher Secondary Education(HSC)
Smt.CHM college
2019 – 2021
Percentage - 95.17%

Secondary Education(ICSE)
Podar International School
2018 – 2019
Percentage - 92.8%

SKILLS

Programming Languages
Java, JavaScript, SQL, C, C++, Python, HTML, CSS

Technical Tools
Git, IntelliJ, PHP Storm, XAMPP, Figma, Netbeans, VS Code, Jira, Confluence, Postman

Libraries/Frameworks
Selenium,TestNG, BDD Using Cucumber, Cypress, React, Laravel, JQuery, Bootstrap, Tailwind

Others
Automation Testing, Object Oriented Programming, Data Structures, UI/UX, Web Pack, JDBC, Web Scrapping

Soft Skills
Problem Solving, Decision Making, Dedicated, Strong Communication

EXPERIENCE

Lazy Bone Innovations Private Limited-SDET Intern
Quill Plus
May 2024 – present
Implemented **end-to-end (E2E) testing using Cypress BDD** for the **B2B** project '**Quill Plus**,' a website serving educational institutions and students preparing for exams. Applied **Agile methodologies** and adhered to **SCRUM practices using JIRA** to ensure seamless functionality of practice and customized tests, optimizing user experience for institutional clients. Rigorously validated all features across multiple browsers and devices, resulting in **reducing the bug rate from 65% in manual testing to 22% through automation**.

PROJECTS

Money Monitor
REST | LARAVEL | REACT
present
• Money Monitor is currently under development, focusing on creating robust backend functionality with **RESTful APIs in Laravel** to **track expenses and incomes** efficiently through meticulously designed endpoints.
• Future phases will integrate these backend services with a responsive React frontend, enhancing user interaction and introducing comprehensive reporting features.

Chat System
JAVA | SOCKET PROGRAMMING
• Real-time chat system applying **OOP principles**, featuring **DES encryption** for messages and files. Utilizes a **multithreaded architecture** for concurrent user handling, with **XML parsing** ensuring structured data transmission.

Fitbite
React | React Redux | HTML | CSS | JS
• Dynamic React-based Health & Nutrition Hub with **real-time SpoonacularAPI insights, recipe management, meal planner**, and secure authentication, providing personalized holistic health solutions.

PenIt
HTML | CSS | PHP | MySQL | LARAVEL | TestNG | Selenium
• PenIt is a role-based web platform enabling **creation, editing, and publishing of posts, categories, and tags**. It supports user verification, **post approval, comment sections**, and is **tested with automated BDD and TestNG** for reliability.

Film Fiesta
React | HTML | CSS | JS
• Multi-page React web app using TMDB API for **dynamic movie data display**. Features **React Router DOM for navigation and custom hooks for efficient API data fetching**, ensuring a seamless user experience in exploring movies.

Auth
PHP
• Auth is a secure application utilizing **Builder and Custom MVC patterns** for login, registration, and password reset. It integrates **token-based authentication, hashing, cookies, and robust security** measures for enhanced application security.

Course Enrollment
Selenium | TestNG
• Developed and executed numerous **TestNG scripts using the Page Object Model (POM)** to rigorously validate course management functionality. Ensured streamlined course creation and enrollment processes, **achieving a 99% success rate in test execution**.

Kid-O-Store
TestNG | Cucumber | BDD | Selenium
• Implemented **TestNG for parallel testing** on <https://internal.kidostore.in/>, ensuring accurate product selection and seamless payment integration.
• Also used **BDD** for end-to-end testing on a student study material website, validating login, shopping, and checkout, **reducing manual testing time by 40% and improving bug detection by 15%**.

Notepad Clone
JAVA | SWINGS
• **Java-based text editor using Swing GUI** with essential features: **copy, save, cut, find, find and replace, and open file**. Includes **file decryption** for enhanced data security.

Ecommerce
REST | LARAVEL
present
• An ongoing e-commerce site uses RESTful APIs and Laravel, allowing **sellers to list products and buyers to make purchases**.
• It features detailed reporting tools for sellers to **track sales and performance metrics**, continually improving the marketplace experience.
