A Smart working personality ready to utilize my skills and passion in any kind of tasks/projects to be completed with utmost honesty and punctuality. Bringing forth a highly optimistic attitude ,willingness and motivation to learn new things

Work Experience

Software Developer Intern, Grame labs(Remote)

July 2024 - Present

- Contributed to the development and deployment of Reeler-AI, an innovative project aimed at generating AI based reels/shorts for users.
- Utilized technologies like React and Python to optimize performance and user experience.

Software Developer Intern, Xangars Labs (Work from office)

May 2024 - July 2024

- Led the development of a user-friendly platform enabling users to generate customized chatbots by simply pasting their website link.
- Designed and implemented the project from inception, utilizing LLM, Web Scraping, React, Python to ensure scalability and performance.

Web developer Intern , MST Networks (Remote)

Feb 2024 - July 2024

- Developed a responsive static website using React to showcase MST Networks' services and provide detailed company information.
- Implemented modern design principles and ensured seamless navigation for enhanced user experience.

Projects

Smart Board using Hand Gesture (Computer Vision)

- Developed an interactive smart board using hand gestures, integrating Computer Vision techniques with a Python-based model and the MERN stack.
- Created a user-friendly web interface enabling gesture-based controls for drawing, erasing, and selecting on the smart board.

BillWise(Gen-Ai)

- BillWise converts physical invoices to digital format with a image capture, then automatically extracts key data points.
- Eliminates manual data entry, saving time, and empowers future financial decision-making through AI chatbot Billy .
- Tackles a key pain point for MSME's, improving efficiency and financial management.

Snappy — Real-time Chat Application(MERN Stack,Socket.io)

- Developed a responsive real-time chat application using React for the front end, Node.js, Express, and Socket.io for the server-side real-time communication, and MongoDB for data storage.
- Implemented key features including instant messaging, user registration, and data persistence, showcasing proficiency in full-stack development and real-time technologies.

Educational Background

VESIT, Mumbai - Bachelor's in Computer Engineering

Year 2021 - present

CGPA - **9.48/10**, till Sem VI

IDUBS Jr. College, Mumbai — HSC(12th std)

Year 2019 - 2021

Scored **86%** in HSC in **Science stream**.

Contact

Location - India , Mumbai

Phone - 9004530891

Mail - malviyapiyush744@gmail.com

Skills

Technical Skills

- Java
- Python
- Web Development
- MERN Stack
- Artificial Intelligence
- Web Scraping
- Gen-AI

Tools/Software

- VS code editor
- Github
- Octaparse (Web scraping)
- Canva
- Figma

Soft Skills

- Interpersonal skills
- Adaptability
- Communication
- Organizational skills

Languages

- English
- Hindi
- Marathi

Certification/Awards

- Won **First Runner Up** price at HackX 2.0 **24 hrs Hackathon** held at NMIMS college.
- Finalist** of 'BuzzPro' a Technical Paper contest held at VESIT.
- Completed Full Stack Development course of Udemy taught by Angela Yu.

Extra Curricular

- Won the **VPL** (Vesit Premier League) a **Football** tournament held at VESIT
- Familiar with cryptocurrency trading practices and possess a solid understanding of market dynamics and investment principles.
