SUMMARY

Enthusiastic and dedicated student eager to transition theoretical knowledge into practical skills within a professional setting. Possessing a strong foundation in various software applications and technical tools, acquired through coursework and personal projects, I am poised to contribute effectively to any team. Demonstrated ability to tackle complex tasks with creativity and attention to detail, coupled with a proactive attitude towards learning and problem-solving.

EDUCATION

Vivekanand Education Society's Institute of Technology

Computer Engineering

CGPI : 9.38

SVPV Junior College

12th, HSC

Percentage : 92.33

Chembur, Mumbai

May 2025

Mira road(e), Thane

March 2021

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python, JavaScript, HTML, CSS, SQL
- **Database:** MySQL, MongoDB, Firebase
- **Frameworks, Libraries, Tools:** Node.js, React.js, React-Native, Flask, Android Studio, Tensorflow, OpenCv, Git, AWS EC2, AWS Amplify, Linux

TECHNICAL PROJECTS

Lane Following and Navigation in a Self Driving Car using Reinforcement Learning

- This project implements a reinforcement learning-based approach for enabling a self-driving car to navigate and follow lanes autonomously. The system is built using Python, leveraging TensorFlow and OpenAI's Stable Baselines library for model development and training.
Tech-stack : Python, NumPy, Tensorflow, Stable Baselines, OpenCV, CARLA Simulator

Covid-19 Detection Using Deep Learning

- Developed a COVID-19 detection model using TensorFlow and CNN architecture to analyze CT scan images accurately. Integrated the model into a Flask-based web app for real-time detection from user-uploaded images.
Tech-stack : Python, NumPy, Matplotlib, Tensorflow, Flask

EduLearn Hub - An Educational Course App

- Developed an educational course mobile application using React Native, providing users with access to a wide range of educational resources and course materials. Leveraged GraphQL to create a custom API for retrieving detailed course information, enabling seamless integration and efficient data management.
Tech-stack : Clerk, HyGraph, GraphQL, Firebase, React-Native, Expo

NewsFlock - React.js based News Website with MongoDB

- Developed a dynamic website using the MERN stack leveraging the News API to fetch real-time news articles categorized based on user preferences. Implemented intuitive user interface and responsive design to enhance user experience and engagement.
Tech-stack : React.js, Node.js, Express.js, MongoDB

YouTube Clone

- Implemented a YouTube clone web application utilizing Material UI for the frontend design and RapidAPI for fetching data from the YouTube API. This project aims to replicate the core functionalities of YouTube, including video playback, search, and recommendations, providing users with a familiar and intuitive user experience.
Tech-stack : React.js, Node.js, Material UI, RapidAPI

CERTIFICATIONS

- Complete Web-Development Course : - Udemy – App Brewery
- Deep Learning Specialization : - Coursera – DeepLearning.AI
- Networking Basics : - Cisco
