EDUCATION

Vivekanand Education Society's Institute of Technology <i>B.E-Computer Engineering CGPA: 9.04</i>	Mumbai, Maharashtra 2021-2025
Lakshya Prep High School and Junior College <i>HSC(Science) Grade: 93.5 %</i>	Navi Mumbai, Maharashtra 2019 - 2021
St. Mary's High School and Junior College <i>SSC Grade: 89.4 %</i>	Navi Mumbai, Maharashtra 2018 - 2019

WORK EXPERIENCE

Mira Advanced Engineering —Intern

- Contributed to the development of four React.js-based projects during a one-month internship.
- These projects exemplified the company's commitment to innovative engineering solutions and showcased my ability to apply React.js for creating dynamic web applications.

PROJECTS

Employee Management System | *React, Express.js, MySql*

- The project encompasses a user-friendly login system powered by Firebase authentication, ensuring secure access for all users.
- Additionally, it features a convenient forgot password functionality, simplifying the process of password recovery.
- Seamless integration with Firebase guarantees robust authentication and data security measures, enhancing the overall reliability of the project.

KidoStore App | *Selenium*

- Automated testing of web applications using Selenium WebDriver and Cucumber, designing and executing test scripts for BDD scenarios.
- Generated detailed test reports and documented results, ensuring high application reliability and stability through rigorous regression testing.

Image Rekognition | *AWS Cloud*

- Leveraged AWS Rekognition to analyze and categorize images, integrating with Lambda for serverless processing.
- Utilized Amazon S3 for scalable storage and DynamoDB for efficient data retrieval and management.
- Developed and maintained automation scripts to streamline image processing, ensuring high performance and reliability of the application.

Congenital Heart Disease Prediction | *HTML, Python, CSS*

- Contributed to a group project focusing on congenital heart disease, leveraging datasets containing fetal heartbeats and echocardiogram images.
- Applied advanced analytical techniques collaboratively to develop predictive models aimed at early detection of potential defects in fetal heart development.

TECHNICAL SKILLS

Languages: C, Java, JavaScript
Frameworks: Express.js, Node.js, React.js, Selenium
Database: MYSQL

ACHIEVEMENTS

Participated in HACK-AI-THON held by AI CoLegion
JavaScript Full Stack development
Automation Testing certification by Study Link.
Volunteered at UI, a non-profit organization founded in 2006 with a distinctive vision.
