Skills

- **ML, Data Visualization and Analysis**
- **Programming** :Python, R,C, Javascript, ReactJS, HTML, CSS
- **Database:** mySQL
- **Devops:** AWS, Github
- **Soft Skills:** Teamwork,Problem-Solving,Adaptability,Critical Thinking,Listening Skills
- **Others:** PowerBI, Tableau

Interest

- Football
- Astronomy
- Chess

About Me

A dynamic team player known for his energetic approach and strong organizational skills. I bring enthusiasm and a willingness to learn to every task. I thrive in collaborative environments and am eager to take on new challenges while continuing to grow and develop professionally.

Education

Vivekanand Education Society’s Institute of Technology, Mumbai	CGPA: 8.70
B.E. in AI & Data Science	Dec 2021 - Present
DAV Public School , Navi Mumbai	Percentage : 93.8%
Completed HSC Class 12 with Distinction	July 2021
New Horizon Public School , Navi Mumbai	Percentage : 96.0%
Completed SSC Class 10 with Distinction	May 2019

Experience

Data Analyst	May 2024 - June 2024
Afame Technologies, Remote	
• Performed data preprocessing and exploratory data analysis (EDA) to uncover patterns and extract useful information. • Trained and fine-tuned machine learning models to achieve optimal performance	
Public Relations and Organizing Officer	April 2022- Present
AI CoLegion VESIT, Chembur	
• Organized and Managed various events like multiple Hackathon, Sessions and workshops . • Guided and Mentored Juniors.	

Projects

XAI in Music Recommender System:	
• Developed an Explainable Artificial Intelligence model for recommending music, focuses on understanding the underlying processes. • Utilized K-Nearest Neighbors (KNN) and K-Means algorithms for training. • Technologies used: Jupyter Notebook, Flask ,Python, and it relevant libraries.	
E Commerce Website for Clothing:	
• Developed a comprehensive e-commerce website focused on the clothing industry, designed to provide a seamless shopping experience for users • features included are user authentication, product browsing, shopping cart management, • Technologies used: React, Bootstrap, JavaScript,	
HR Data Analytics:	
• Conducted EDA on an HR dataset to identify factors influencing employee retention. Applied SMOTE to ensure fairness and remove bias. • Performed feature engineering to highlight significant attributes for informed retention decisions.	
Obesity Risk Classification:	
• Developed an ensemble learning model for classifying obesity risk • Envolving data preprocessing, EDA, and the application of various machine learning techniques to achieve optimal performance. • Technologies used : Google Colab/Jupyter Notebook	

Certification

AWS Cloud Foundation (AWS Academy)	January 2024
AWS Academy Course on Cloud Developing (AWS Academy)	March 2024
NVIDIA Deep Learning Specialization	July’23-March’24
