

Pursuing final year Electronics and Telecommunication with minor in Cyber Security at Vivekanand Education Society's Institute of Technology.

### Projects Undertaken

- Machine learning model for early detection of PCOS (2024)
- Currency detector for visually challenged (2023)
- 16 bit approximate adder implementation on FPGA(2024)
- Smart energy meter (WattWatch) using Arduino, Raspberry pi and STM32 (2023)
- Smart waste management system (2023)
- Home automation using Arduino Uno (2022)
- Solar powered wireless charger (2022)

### Cocurricular Activities

- ❖ IEEE VESIT | August 2023- present  
Graphics Executive Officer. Organized and conducted Figma workshop. Managed all the graphics operations for IEEE VESIT.
- ❖ Participated in Eyantra robotics competition 2023-24
- ❖ LBS competition 2022-23  
Gave solution to solve social and environmental problem of waste segregation by making a device that automatically segregates dry and wet waste using Arduino UNO
- ❖ IDEATHON 2023  
Made a Smart Energy Meter that can display user's real time energy consumption and billing data on user's IOT device that makes.

### Extracurricular Activities

- Editor at VESIT PhotoCircle (August 2022-present)
- Senior Graphic Designer at EXTC Newsletter (August 2023-present)
- Graphic Designer at EXTC Newsletter (August 2022-July 2023)

### Experience

PRODUCT ENGINEER INTERN | PANACHE DIGILIFE LTD (NOV 2023- DEC 2023)

- Made a currency detector with RGB sensors and machine learning for visually challenged. The model could distinguish between currency denominations and real and fake currency notes.

## INTERNSHIP | UNNAT BHARAT ABHIYAN

- Developed solar charge controller and installed solar street lights in the village Asnas under Unnat Bharat Abhiyan.

## Education

### ▪ BACHLOR OF ENGINEERING IN ELECTRONICS AND TELECOMMUNICATION

Vivekanand Education Society's Institute of Technology, Chembur. Aggregate CGPA: 8.81.  
Expected graduation: May 2025

## Skills & Abilities

- Python, SQL, Advanced Excel, Verilog, Power Bi, Linux, C, C++, Arduino, Raspberry Pi, STM32, ESP, PCB design
- Critical thinking, Communication and Leadership, Team Player, Learning agility, Attention to detail

## Certifications

- Google Cybersecurity Professional Certificate - Coursera
- Networking Basics - Cisco

## Publications

- Paper titled "Wattwatch: Innovative Cloud based Energy Monitoring System" IEEE Conference Advanced Computing and Communication Systems

## Other Interests

Cyber Security, Data analytics, Machine learning, Reading
