About

As a passionate computer engineer with a collaborative spirit, I excel in solving complex problems with a robust tech stack. During my internship at Pixolo Productions, I developed scalable backend solutions for Pango.in. I also expand my knowledge through hackathons and leadership roles, such as Senior Technical Manager at Codecell and SE Technical Officer at ISTE.

Education

Vivekanand Education Society's Institute Of Technology

Bachelor of Computer Engineering (B.E.) with Honors in Blockchain (CGPA of 9.2)

Dec 2021 - June 2025

Mumbai, India

Technical Skills

- **Languages:** Java (proficient), C, Python, JavaScript, TypeScript, SQL, C#, Dart, Solidity
- **Frameworks & Libraries:** ReactJS, NextJS, NodeJS, ExpressJS, Redux, Flask, Flutter
- **Databases:** MongoDB, Firebase, MySQL, MS SQL Server, Pinecone
- **Developer Tools:** AWS, Docker, Git, GitHub, Vercel, Render, Jenkins

Internships

Pixolo Production

Backend Developer Intern

Dec 2023 - March 2024

Mumbai, India

- Developed robust and scalable **RESTful APIs** using Express and Node JS, ensuring efficient data retrieval and manipulation from MongoDB.
- Executed a seamless migration from JavaScript to TypeScript, resulting in an **80% improvement** in codebase maintainability and readability.
- Designed MongoDB models and schemas to **optimize data organization** and retrieval, contributing to overall system efficiency.

Application Developer Intern at VESIT

Flutter Developer

May 2023 - June 2023

Mumbai, India

- Achieved significant time and effort saving for the student by developing a printing app using **Flutter, Node.js, Express, and Firebase**.
- The application has features like **remote file uploading** and printing with **customization like number of copies, single/both sides** while persisting the printing data in the database.

Projects

Smart Traffic Enforcement and Resolution System | Hyperledger Fabric, IoT, ReactJS | GitHub

May 2024

- Developed an **IoT and blockchain-based system** for automated traffic violation tracking and ticket management, featuring real-time speed monitoring, challan generation, online dispute resolution, and integrated payment gateway.

Travel Planner | ReactJS, Firebase, TensorFlow, Flask, Fetch AI | GitHub

March 2024

- Designed an AI-powered travel website featuring image recognition for landmark identification, an **NLP chatbot powered by BERT** for personalized itineraries, and an interactive booking agent to streamline travel arrangements.

EduBridge | ReactJS, NodeJS, Express, MongoDB, Redux, AWS | GitHub

January 2024

- A digital platform revolutionizing assignment submission and evaluation, reducing paper usage by **300 pages** per student per semester.

Data Structure Visualizer | Unity, C# | Video Link | GitHub

August 2023

- Pioneered an interactive Unity project for students to visually explore and manipulate **data structures in 3D**.

Achievements

- **1st Runner Up** at AIML-based Web Development hackathon organized by ISTE-VESITxQuestIT (Certificate Link)
- **5th position** at Recursion 5.0 (RGIT).(Certificate Link)
- Among the **top 10 teams** in state-level Hackathon DevIgnite. (SIGCE)
- **Wolfram award winner** in Soft CodeHack 1.0 Hackathon (Award letter)
- **Secured First Position** in 'BuzzPro' a technical paper contest organized by Vivekananda Education Society's Institute of Technology (Certificate Link)
- Taught **Git, GitHub, and Web Development** in offline workshops with more than 120 students in attendance (Certificate Link)
