CERTIFICATIONS

2024 Tableau Certified Data Analyst Training

- Gained a deep understanding of Tableau Public, Desktop, Prep, Online, Server, and Bridge from the perspective of a Professional Analyst and mastered the skills needed to create data visualizations using Tableau.

The Complete 2024 Web Development Bootcamp

- Learned the latest technologies, including Javascript, React, Node and even Web3 development.
- Built 16 web development projects.

Google Cloud Computing Foundation

- This curriculum consisted of 40 hours of content covering 10 topics with resources including editable slides and teaching notes, hands-on labs through Google Cloud Skills Boost, facilitator guides and lesson plans, and multiple-choice knowledge assessments.

PROJECTS

CarboNeutral

HTML, CSS, JS, PHP & MySQL

- Helps an organization reduce its carbon footprint and maintain an eco-friendly business environment.
- Organizations can take personal assessments to collect personalized suggestions and work on them.

Facial recognition based attendance management system

Python, Computer Vision

- System takes attendance electronically with the help of face recognition.
- A biometric (face) identification-based system is used for student identification. After recognition, the records of the attendance are stored in a database.

ISL Translation System

Python, TensorFlow, Mediapipe

- Real-time translation of Indian Sign Language (ISL) gestures into English text.
- Utilizes TensorFlow and Mediapipe for accurate gesture recognition and interpretation.

Voice assistant for form filling

Python

- This project is a voice-controlled form filling application built using Python and speech recognition library.
- The application allows users to fill out a form by speaking the responses instead of typing them.

ACHIEVEMENTS

- Presented a final year project and paper in an inter college competition.
- Secured 2nd place in CSI quiz competition.
- Awarded the best player of VESP Spurthi '22

SKILLS & INTERESTS

Skills: Web development, MS Office

Languages: Java, Python, HTML/CSS, PHP, JavaScript, SQL

Technologies/Frameworks: AWS, GitHub, MySQL
