Experience

International Institute of Information Technology, Hyderabad (IIIT-Hyderabad) **Oct 2023 – Present**

Research Intern

Mumbai, Maharashtra

- Part of two-wheeler mobility research project aimed at **finding anomalies and analyzing driver behavior** using machine learning algorithms such as LSTM, GRU, AdaBoost, XGBoost, and Multi-Layer Perceptron - Random Forest ensemble model.
- Developed and fine-tuned models, processed large datasets, enhancing predictive accuracy by achieving low error resulting in significant improvements in detection accuracy.

Reliance Jio

Dec 2023 – Jan 2024

Intern

Navi Mumbai, Maharashtra

- Developed and executed a **Training Needs Analysis** to assess current skill gaps within the organization, resulting in targeted training programs for the role of **RF Engineer**. Conducted comprehensive data analysis to extract meaningful insights and trends, utilizing tools such as **Excel**.

Hindustan Petroleum Corporation Limited

May 2023 – July 2023

Project Trainee

Mumbai, Maharashtra

- Implemented a **texture-hidden QR code system** using Python, incorporating 3+ methods to enhance security and combat counterfeiting effectively.

Technical Skills

Languages: Java, Python, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Google Colab, Android Studio

Technologies/Frameworks: Flask, Django, GitHub, Flutter

Education

Vivekanand Education Society's Institute of Technology, Chembur, Mumbai

Dec 2021 – May 2025

Bachelor of Engineering in Computer Engineering, Honors in AI/ML

- CGPA : 9.31
- Senior Software Developer at the International Society of Automation (ISA-VESIT) | May 2024-Present
- Junior Software Developer at the International Society of Automation (ISA-VESIT) | Aug 2023-May 2024
- Second Year Co-ordinator at the International Society of Automation (ISA-VESIT) | Feb 2023-August 2023

DAV Public School, Nerul

Apr 2019 – July 2021

HSC | CBSE | Physics, Chemistry, Mathematics with Computer Science

Per: 94.2%

Certifications

- Programming in Python by Meta [Link](#) // [Certificate](#)
- Fundamentals of Deep Learning by NVIDIA [Link](#) // [Certificate](#)

Projects

ChatGPT Clone using Django | *Python, HTML, CSS, Django*

Aug 2023-September 2023

- Developed a ChatGPT clone using Django, using HTML and CSS for frontend and Django for backend. Integrated Hugging Face API to provide natural language processing capabilities.
- Presented the ChatGPT clone project in a workshop with over 300 registrations. [Link](#) // [ChatGPT Clone using Django](#)

Anti-Counterfeiting QR Code and Verification Method | *Python, PyImageJ, Flask, HTML, CSS*

July 2023

- This project designs a texture-hidden anti-counterfeiting QR code to solve the problem of easily illegally copied QR code. [Link](#) // [Anti-Counterfeiting QR Code and Verification Method](#)

Lung Disease Classification using Machine Learning | *Python, HTML, CSS, Javascript, Flask*

May 2023

- Developed an impactful website aimed at diagnosing lung diseases by enabling users to upload their lung X-ray scans, facilitating accurate prediction of the specific type of lung disease. [Link](#) // [Lung Disease Classification using Machine Learning](#)
