Hard Skill

Web development Programming

- HTML, CSS
- Javascript
- ReactJs
- Flask
- Nodejs, Express
- React-native
- Java
- Python
- C
- SQL
- PHP

Database Management

- Firebase
- MYSQL
- MongoDB

Soft Skill

- Communication
- Decision making
- TeamWork
- Time Management

Education Background

● SSC(Class X)

Shivner Vidya Mandir High School
(Sakinaka, Mumbai)

Completed in 2019

Percentage - **91.80 %**

● HSC(Class XII)

Ramniranjan Jhunjhunwala College
(Ghatkopar, Mumbai)

2019-2021

Percentage - **95.50 %**

● B.E in Computer Engineering

Vivekanand Education Society Institute of
Technology
(Chembur, Mumbai)

2021-2025

Grade - **9.97 CGPA** (upto SEM VI)

About Me

I am a computer engineer in VESIT, Mumbai, currently pursuing my Fourth year of study. With a strong passion for web and Software app development, I have accumulated valuable experience in crafting responsive and dynamic websites and applications

Projects

Travelix Website

May 2023 - July 2023

HTML, CSS, JS, MYSQL(xampp), ReactJS, Rapid API(Yahoo Weather)

- Developed dynamic web pages using HTML, CSS, and JavaScript, along with ReactJS for the Travelix website.
- Implemented essential features including booking, signup, signin, and reviews functionalities, providing users with seamless interaction.
- Integrated Yahoo Weather API to display real-time weather information.

TourSentiments Recommendation System with AI

Aug 2023 - Mar 2024

ReactJS, Python, MongoDB, MYSQL, Google Cloud Platform(Maps, Street View, Geolocation), Gemini API

- Utilized ReactJS(Vite) to develop multiple dynamic web pages
- Employed MongoDB for user authentication purposes of user.
- Utilized MySQL to store preprocessed tour dataset efficiently.
- Integrated Gemini API to recommend daily tour plans tailored to individual preferences and constraints, enhancing user experience and satisfaction.
- Utilized Google Cloud Platform services, including Maps, Street View, and Geolocation APIs, to display interactive maps, routes, and street views of tour destinations, providing users with valuable information and visualizations.

CleanSeas Application

Feb 2024 - April 2024

React Native, Firebase

- Developed an app where organizations can post cleanup events and users can participate in them.
- Implemented features to show events at the user's location.
- Created a community calendar feature to display all events in the current month.
- Created other features like link for events in community, profile page, etc.

Carbon Footprint App - Optimizing Sustainability

May 2024 - July 2024

React Native, Firebase, Flask

- Developed an app where user can take a survey about their various monthly activities and display their carbon footprint monthly
- Implemented reduction module and footprint calculation module, display analytics graphically
- Created daily quiz section, leaderboard and league section to keep users interacted and interested to use the app
- Created Queries section to resolve queries of users
- Implemented suggestions based on user data as well as appliances survey by creating API using flask. As well as display top news using NEWS API.

ExtraCircicrular Activities

BuzzPro Competition(2023)(3rd Rank)

Buzz Pro is Technical paper presentation contest conducted by IIC and IQAC)

Achievements

2021-2022 Ranked within top 7 in First Year of Computer Engineering at VESIT

2022-2023 Ranked 1 in Second Year of Computer Engineering at VESIT
