Education

Vivekanand Education Society's Institute of Technology– CGPA: 9.57

2021 – 2025

Bachelor of Engineering in Computer Engineering

Mumbai, Maharashtra

Narayana Junior College– Percentage: 97.67

2019 – 2021

HSC Board

Thane, Maharashtra

Experience

IIIT Hyderabad

October 2023 – Present

Research Intern

VESIT

- Part of two-wheeler mobility research project aimed at finding anomalies and analyzing driver behavior using machine learning algorithms such as LSTM, GRU, AdaBoost, and XGBoost.
- Developed and fine-tuned models, processed large datasets, enhancing predictive accuracy by achieving low error resulting in significant improvements in detection accuracy.
- Collaborated with team members to deliver project deliverables.

Projects

Rental Furniture Shop Management System | Java

October 2022

- Developed a comprehensive rental furniture shop management system using Java, enhancing skills in object-oriented programming and software development.
- Implemented features for managing furniture inventory, including adding new items, upgrading quantities, and searching by serial number or dealer name.
- Designed an interactive menu-driven console application to facilitate user interactions.

PulmoHelp | Python, Google Colab, Flask | Live

May 2023

- Developed an impactful website aimed at diagnosing lung diseases by enabling users to upload their lung X-ray scans, facilitating accurate prediction of the specific type of lung disease.
- Achieved an accuracy of 81%, 76%, 63% in the classification of lung diseases using CNN, SVM and Logistic Regression respectively.

Dish Discover | React | Live

April 2024

- Developed a web application that provides information about numerous food items from around the world. It provides information such as category, area, ingredients and instructions.
- Used asynchronous javascript to fetch information about dishes from the REST MealDB API.
- Used CSS to create a responsive UI.

Trackrr | MERN | Live

May 2024

- Developed a full-stack web application using MongoDB, Express.js, React.js, and Node.js to help users track and manage job applications and displays relevant statistics.
- Implemented secure user authentication with JWT, CRUD operations for job applications, and responsive design for various devices..
- Designed the front-end with React.js, built the back-end API with Node.js and Express.js, managed state with React hooks, and integrated MongoDB for data storage.

Technical Skills

Languages: Java, Python, SQL

Developer Tools: VS Code, Google Colab, Android Studio

Technologies/Frameworks: Flask, React, MongoDB, NodeJS, ExpressJS, GitHub

Leadership / Extracurricular

Computer Society of India–Vesit

August 2023 – March 2024

Senior Public Relations Officer

VESIT

- Collaborated with a team and executed design concepts into visually appealing posters for social media platforms, enhancing online presence and interaction with the student community.
- Implemented feedback and revisions to optimize visual communication strategies and increase engagement metrics.

Certifications

- Programming in JAVA (NPTEL)
- Basics of AWS (Internshala)
