PROJECTS

- | | |
|--|--|
| ● Cancer Prediction
Python , Streamlit
 | The cancer prediction system dashboard provides insights into cancer care and prediction . Models to predict patient survival, treatment needs, cancer stage, and chemotherapy requirement with accuracies ranging from 85% to 97% . |
| ● VESIT Event Management System
Python (Tkinter GUI) , MySQL
 | It is an Application used to create events and students can register in it. It helps the council member organize the event and ask permission from HOD to host it. It is made using the Tkinter GUI library in Python and MySQL in the backend. |
| ● Shrine Connect
MERN Stack
 | The project is a user-friendly website that enables easy and secure donations to support the temple . It provides real-time updates on events, allows booking for ceremonies , and sends notifications to users , ensuring they stay engaged with the vibrant temple community seamlessly |
| ● Social Responsibility Team Management System
HTML , CSS , MySQL
 | A website to manage all the events conducted by the SORT council. Here students are able to know the upcoming event and register in the events as well as help council members to keep a track of all participants . Council members also have control over the events |
