PROJECTS

Airline Reservation System (Java | MySQL) ([Github](#))

Developed an Airline Reservation System which has a waiting list functionality that avoids overbooking and thereby cancellation of reservation made from airline's end.

House price prediction system (Python | Scikit-learn library)

Developed a model for predicting house prices in the USA real estate market where 'Linear Regression' emerged as the most effective model with an accuracy of 91.7%.

WORK EXPERIENCE

Full stack development Intern at AttoInfotech LLP, Dadar

October 2023- April 2024

- Engaged in developing a **personalized travel planner**, that generates travel itinerary according to user preferences and budget, **in minimal cost of Rs 0.81**. It includes other features like hotel booking, weather predictions and mapping nearby hospitals, cafes and restaurants.
- Focused on backend architecture using Node.js, Express.js and frontend using React while using MongoDB for database, Git for version control along with GenAI API and other supporting APIs.

App development intern at National Society For Equal Opportunities For the Handicapped, India, Chembur

January 2023 - June 2023

- Engaged in the planning, architecture, development, and implementation of Python-based application using MySQL database for **managing data of 3000+ students and for automating placement process of NGO**.
- Engaged in software testing, software maintenance and documentation including creating user manual and report.
- It boosts the productivity of NGO placement administrators and helps them save time.

Volunteer at Parag Pratisthan NGO, Ghatkopar

August 2023 - November 2023

- Participated in a food donation drive conducted by the NGO.
- Volunteered to teach art to underprivileged students.
