- **SSC**
Maharashtra State Board
2019
PERCENTAGE- 92.40/100

About Me

As a Computer Science and Engineering student, I bring a solid foundation in basic math and a knack for logical thinking to the table. While I'm at a beginner level in programming and problem-solving, I am enthusiastic about expanding my skill set and embracing new challenges in the field. My coursework has provided me with essential theoretical knowledge, and I am committed to applying this knowledge to practical scenarios.

Internship

I am doing my internship (Remote) at CLARIO as a imaging dev intern. It is a 3 month internship where I completed 1 month of training and now working on my first project. CLARIO is a US based healthcare research and technology company working on clinical Services. this internship is helping me to improve my hard skills as well as soft skills. It is a best experience to work along with corporate leaders.

Projects

Mobile Application on sports event management

Sportify is a mobile application where you can get updates, news and information about upcoming sport events in your city, where you can register and participate in the events. it is user-friendly mobile application, also we can say it is all in one sports app.

E-commerce Web Application

Designed and developed an e-commerce web application specializing in watches, offering a seamless shopping experience. Implemented user-friendly features for product browsing, selection. by making this project i developed my frontend skills and UI/UX design.

Extra-curricular

Senior Deputy Sports Secretary, VESIT

Contributed to the growth and development of college's sports program while balancing academic responsibilities in Computer Science and Engineering.
