

EDUCATION

Vivekanand Education Society's Institute of Technology

- 4th year Engineering student -Artificial Intelligence and Data Science
- Honors in Cybersecurity
- CGPI - 9.57
- 12th passed - 92.8% 2021
- 10th passed - 92.2% 2019

SKILLS

- C /Java /Python /Bash
- Blender 3D
- Burp Suite
- Flutter
- Android studio
- Html /CSS /Javascript /React
- Linux
- Tensorflow / PyTorch

CERTIFICATIONS

- [Introduction to Cyber Security -tryhackme](#)
- The Complete Python Bootcamp From Zero to Hero in Python -Udemy
- Fundamentals of Deep learning- Nvidia
- [Advent of Cyber 2023 - THM](#)
- AWS Academy Cloud Developing
- [Mastercard-Cybersecurity Job Simulation\(Forage\)](#)
- [Applications of AI for Anomaly Detection - Nvidia](#)

PROJECTS

Flutter App for Plant Disease Detection

Mini project | 2023

- **Objective:** Created an accessible platform for users to identify plant diseases in real-time, aiding in efficient crop management.
- **Implementation:** Integrated YOLO algorithm into the Flutter framework to enable on-device disease detection through uploaded images or live camera feed.
- **User Interface:** Designed an intuitive user interface allowing easy image upload, real-time camera usage.
- **Collaboration:** Collaborated within a team to seamlessly integrate the algorithm with the Flutter app's frontend and backend components.

Discord Bot

Mini project | 2023

- **Objective:** Developed a multifunctional Discord bot leveraging Python, enabling users to play audio, engage in mini-games, and interact with the OpenAI API for dynamic responses.
- **Audio Playback:** Implemented audio streaming functionality to allow users to play music tracks and audio clips directly within Discord voice channels using commands.
- **Mini Games:** Designed and integrated interactive mini-games, enhancing user engagement within the Discord server.
- **OpenAI API Integration:** Successfully integrated the OpenAI API to enable the bot to generate contextually relevant responses, enhancing user interactions with natural language processing.

Honeypot using Azure

Personal Project | 2023

- Used custom PowerShell script to extract metadata from Windows Event Viewer to be forwarded to third party API in order to derive geolocation data
- Configured Log Analytics Workspace in Azure to ingest custom logs containing geographic information (latitude, longitude, state/province, and country)
- Configured Custom Fields in Log Analytics Workspace with the intent of mapping geo data in Azure Sentinel
- Configured Azure Sentinel (Microsoft's cloud SIEM) workbook to display global attack data (RDP brute force) on world map according to physical location and magnitude of attacks.

ACHIEVEMENTS

- Ranked 734 in Hack the box's Cyber Apocalypse CTF 2024
