Objective

To leverage my programming skills and passion for technology, contributing to innovative projects while growing professionally. Committed to making a positive impact on the team and the organization.

Education

3 Years [2022-2025]	Bachelor of Electronics & Telecommunication Engineering, Vivekananda Education Society's Institution of Technology, Mumbai	8.98
3 Years [2018-2021]	Diploma in Electronics Engineering Government Polytechnique Mumbai	88.57%
	SSC, Dr. D. B. Kulkarni Vidyalaya	82.60%

Projects

- **Design of Portable ECG machine with Android Application** – to ease the process of ECG reporting a portable ECG machine was design on FPGA and via Bluetooth the data was transferred to the mobile application and was displayed real-time.
Hardware used: FPGA Board, Bluetooth module, ECG sensor
Software used: Java, Verilog, Vivado, Android Studio
- **Digitalized Ordering system IOT based** – a IOT network that was hosting a webpage containing menu card for hotel which user can use to order the dishes without waiting for waiters. The order was transferred to the kitchen and displayed over the screen,
Hardware used: ESP module
Software used: HTML, CSS, Embedded C, Python
- **IOT based Irrigation System** – to resolve the issue for plant watering a IOT based irrigation system was design which will collect the moister data from soil and send to a raspi with LORA Technology and depending on the conditions the water pump will supply water.
Hardware used: Arduino UNO, Raspberry pi 3B+
Software used: Embedded C, Python
- **Web SCADA design** – To control a thermal plant from anywhere a Web SCADA system was implemented using which the user can control the plant from any location.
Hardware used: PID controller, Virtual Box device
Software used: SCADA

Internship

- Web application project based on Python – Django interacting with Raspberry Pi, Chefronics technologies pvt.ltd. from march 2023 – may 2023.
- Arduino based embedded system design, IIT Bombay, April 2022 – August 2022
- Web SCADA system design, Deepleeds Innovation pvt.lmt., Feb 2021 – July 2021.

Competitions & Certification

- Smart India Hardware Hackathon 2023
- Python certificate, NPTEL

Skills & Abilities

TECHNICAL SKILLS

- **Languages:** Python, Java, Embedded C, HDL (Verilog).
- **Platforms:** Windows 10/ 11, Linux, RedHat, Ubuntu.
- **Android development:** Java, Android Studio.
- **Database:** Apache, MySQL.

ORGANIZING SKILLS

Leadership, project management, Documentation, Task Coordination, Problem solving.
