EDUCATION

Vivekanand Education Society's Institute of Technology
Mumbai, Maharashtra

Jan 2021 - Jun 2025

Bachelor's of Engineering in Information Technology.

- CGPA - 8.67

R. C. F. Junior College

Jun 2019 - Jun 2021

- HSC Marks - 86.80%

R. C. F. Secondary and Higher Secondary School

Jun 2018 - Jun 2019

- SSC Marks - 88.40%

TECHNICAL EXPERIENCE

InnoBytes Technology | Web Developer Intern

May 2024 - July 2024

- Led the development of 'FarmFusion,' a MERN stack-based platform tailored for the agricultural sector to help farmers expand market reach.
- Engineered secure user authentication with MongoDB.
- Implemented CRUD operations and an intuitive 'add to cart' feature for admins.
- Enhanced user experience with Google Translate API for multilingual support.
- Integrated Stripe API for secure payment transactions.

Prodigy InfoTech | Web Developer Intern

Jan 2024 - Feb 2024

- Spearheaded the development of a dynamic personal portfolio website, showcasing professional achievements and skills.
- Engineered a user-friendly tic-tac-toe web application.
- Designed and integrated a weather application utilizing API integration, providing real-time weather updates to users.
- Conceptualized and crafted a stopwatch application, improving time management efficiency for users developing proficiency in contemporary frontend technologies such as HTML5, CSS3, and JavaScript.

PROJECTS

InsightCart | Flask, Python, Apriori Algorithm

- Developed 'InsightCart', an e-commerce platform using the Apriori algorithm for personalized recommendations, boosting user experience and sales.
- Implemented automated email notifications for product suggestions, enhancing engagement and marketing relevance.
- Integrated linear regression for sales trend prediction, supporting data-driven decisions and strategic planning.
- Created a user-friendly admin interface for efficient CRUD operations, streamlining management and improving efficiency.

HomeValueVision | Tkinter, Python, Random Forest

- Spearheaded the development of the Real Estate Price Predictor leveraging Python and Tkinter GUI.
- Implemented the Random Forest Algorithm to ensure precise and reliable price predictions
- Designed an intuitive frontend for user interaction.
- Enabled forecasting of future real estate prices using a simple formula, aiding informed decision-making for property investments.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, C, JavaScript
- **Databases:** MongoDB, SQLite, MySQL
- **Web Technologies:** ReactJS, Node.js, Flask, HTML, CSS, Bootstrap
- **Version Control:** GitHub
- **Others:** Machine Learning, Association Rule Mining
- **Computer Science:** OOPS, DSA

LEADERSHIP / EXTRACURRICULAR

Niti Foundation | Volunteer

June 2023 – Dec 2023

- Volunteered three hours weekly for a month at Aarna Foundation, instructing a diverse group of elderly citizen.
- Organized tailored activities, fostering community and well-being among residents.
