Education

Pursuing Bachelor of Engineering (B.E) Computer Engineering, Vivekanand Education Society's Institute of technology | CGPI: 9.13
Diploma in Computer Engineering Vivekanand Education Society's Polytechnic | 2022 Percentage : 87.66

Specialized Skills

- **Programming languages and Technologies** : C, C++, Java, HTML, CSS, JavaScript, PHP, SQL, Laravel, React, Automation Testing.
- **Tools**: Figma, Photoshop, Sublime, Postman, Git, VsCode, Cypress, Selenium.
- **Skills**: Problem Solving, Designing, Team Work, Adaptability, Organized.

Projects

- **PEN-IT Website**
 - Designed and implemented CRUD operations for tags, posts, and categories within the Laravel framework.
 - Grant admin the ability to assign and revoke admin privileges, ensuring secure authentication and authorization.
 - Implemented soft deletes to enable trash system, offering users seamless recovery or permanent deletion of deleted posts.
 - Implemented access control to allow only the post owner to edit or delete their respective posts, enhancing data integrity and security.
Technology Used : LARAVEL | HTML | CSS | JS
- **Questions & Answers Website**
 - Developed comprehensive CRUD functionalities for managing questions and answers, adhering to Laravel's MVC architecture.
 - Configured a voting system that enables users to upvote or downvote questions and answers so that users can express their opinions and determine the relevance of questions and answers enforcing user engagement.
 - Implemented features that allow question owners to delete their questions if unanswered and if the answer is marked best the owner of the answer cannot delete that answer.
 - Integrated the Mailtrap service to facilitate email notifications to be sent to the respective owner on receiving response to the question, ensuring timely communication and user engagement.
Technology Used : LARAVEL | HTML | CSS | JS
- **REST-API (REST Based E-commerce website)**
 - Created a REST API based e-commerce project by implementing various functionalities for users, buyers, sellers, categories, products, transactions, and passport.
 - **Users**: Implemented CRUD operations for managing users, Along with functionality to resend verification codes for user accounts.
 - **Buyers**: Implemented endpoints to retrieve buyer details, transactions, products bought, sellers associated, and categories bought by a buyer.
 - **Sellers**: Developed endpoints to retrieve seller details, categories in which a seller is selling products, buyers to whom products are sold, products sold, and operations related to product management.
 - **Category**: Implemented CRUD operations for managing categories and functionality to retrieve products, sellers, transactions, and buyers associated with a category.
 - **Products**: Developed endpoints for managing products, including CRUD operations, associating categories, and retrieving related information such as transactions and buyers.
 - **Transactions**: Implemented endpoints to retrieve transaction details, associated categories, and sellers.
Technology Used : LARAVEL | HTML | CSS | JS | POSTMAN
- **Film-Fiesta(React Based website)**
 - It fetches data from the TMDB API to display information about movies, TV series, and people.
 - The website includes a mode-switching functionality between Dark and Light modes to enhance the user experience.
 - It also features search functionality for easy navigation.
 - Various components, hooks, and pages are utilized in the website's architecture.
 - Tailwind CSS is used for styling and layout purposes.
Technology Used : REACT | TAILWIND CSS | JSX **Live Project Link** : [Fim-Fiesta](#)
- **Kid-O-Store Website(Automation Testing)**
 - Performed Automation Testing using BDD with Cucumber.
 - Developed structured step definitions, tests, and validation hooks to ensure comprehensive test coverage. Resulted in reduced manual testing time, and enhanced application reliability.

Certification

- **Automation Testing** : [Certificate](#)

OnGoing Project

- **DES Encryption Algorithm** : Implementing DES Encryption Algorithm for developing a secure encryption solution for data protection using java.
