

SUSMITA SANTI

SOFTWARE DEVELOPER

✉ susmitasanti04@gmail.com | ☎ +91 9004726388

ABOUT

Passionate about technology, I excel in collaborative environments, with strong fundamentals and problem-solving skills. While specializing in web development, I have demonstrated versatility across diverse projects and hackathons, embracing different domains and technologies.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES:

Java, Python, JavaScript,
TypeScript, C++, C

FRAMEWORKS AND TOOLS:

ReactJS, NextJS, ExpressJS,
NodeJS, Flask

DATABASE:

MongoDB, MySQL, PostgreSQL

IT CONSTRUCTS:

DSA, DBMS, OS

DEVOPS:

Git, GitHub, AWS (EC2, S3), Docker,
Kubernetes, Jenkins

SOFT SKILLS

- Leadership
- Multitasker
- Fast Learner
- Ability to work under pressure
- Adaptability

ACHIEVEMENTS

- **1st Runner Up** at **Code for Good '24 Hackathon** (JPMC).
- **Finalist** in **All India Women '23 Hackathon**(SSF).
- **Finalist** in **Syrus Hackathon**(VESIT).

EDUCATION

VES Institute of Technology
Bachelor of Engineering
2021-2025 | CGPI 9.64

PACE Jr. Science College, Dadar
HSC 2019-2021 | 91.50 percentage

Our Lady of Good Council High School
SSC 2019 | 90.60 percentage

EXPERIENCE

SUD Life Insurance| Swechchha **Software Developer Intern**

JULY, 2023-PRESENT

- Contributed to "Swechchha," an app managing BMC toilets in 150 slums, by enhancing the codebase and accurately capturing volunteer coordinates.

ISTE-VESIT **Junior Technical Officer**

DEC, 2022-PRESENT

- Led workshop on React, Flask, SparkAR, Git, GitHub and recommendation systems, attended by 200+ students.
- Organized 24-hour hackathon with 400+ participants.

Pixelo Productions **Backend Developer**

DEC, 2023-FEB, 2024

- Led backend development, building scalable systems.
- Automated tasks with macros for enhanced efficiency.
- Developed custom VSCode snippets for faster coding.
- Utilized OpenAI tools to expand project capabilities.

techAsia Mechatronics Pvt Ltd. **Full Stack Developer**

MAY, 2023-JUL, 2023

- Monitored appliance data.
- Led full-stack dev: backend, frontend.
- Implemented robust tracking features.
- Developed detailed usage history.

Knowledge Solutions India **Data Science Analyst**

DEC, 2022-JAN, 2022

- Completed a 6-week internship in Data Science and Analytics using Python, focusing on an Iris Classification project with various algorithms.

College of Engineering, Pune **Java Developer**

DEC, 2022-JUL, 2023

- Developed generic algorithms for various mathematical problem statements using Java during internship.
- Implemented solutions in Java to address specific mathematical problems provided.

PROJECTS

FemCare-Connect

ReactJS | ExpressJS, NodeJS | MongoDB

- A women-centric project with features including:
- Menstrual cycle tracker for personalized health monitoring.
- Pharmacy functionality with integrated payment system and cart management.
- Community-building blog section to foster engagement and support.
- Gynecologist locator for convenient access to healthcare services.

NeuroCogniTrainer

ReactJS | ExpressJS, NodeJS | MongoDB | UNITY | Seaborn, Matplotlib | PyTorch, Tensorflow, Numpy, Pandas, MNE

- An integrated system aimed at enhancing cognitive retraining for children with developmental disabilities.
- Keeping a track of patient's activities and gaining updates on their status.
- One stop platform by integrating Electroencephalogram (EEG) based neurofeedback training.
