Education

Vivekanand Education Society's Institute of Technology

B.E in Information Technology (CGPA: 8.55 / 10.00)

Expected May 2025

Mumbai, Maharashtra

Smt. Sulochanadevi Singhanian School

Indian School Certificate for higher secondary education (Percentage: 94.2%)

May 2021

Thane, Maharashtra

Smt. Sulochanadevi Singhanian School

ICSE (Percentage: 97%)

May 2019

Thane, Maharashtra

Skills

Programming Languages: Java, Python, Javascript

Technologies: HTML, CSS, React.js, Node.js, MySQL, MongoDB

Soft Skills: Problem Solving, Communication, Flexible, Team work, Leadership, Goal Oriented,

Concepts: Operating System, Database Management System, Object Oriented Programming, Computer Networks

Projects

Cancer Related Predictions System | Python, Machine Learning, Streamlit

- This project took 20 years of stomach cancer data from the Surveillance, Epidemiology, and End Results (SEER) database of USA to build four machine learning models to predict the stage of cancer, recommendation of chemotherapy, recommendation of radiation and surgery and months of life expectancy.
- Through rigorous process of data preprocessing and model training and testing, we were able to achieve high accuracies of 85%, 90%, 94%, 97%

Shrine Connect | HTML, CSS, Node.js, Express.js, MongoDB

- Shrine Connect is a Mandir Management System built for the Kanttathilu community of Karnataka. This website is useful for community members who live in different cities and countries to practice their faith.
- It offers a range of functions that simplify the user's engagement with the temple community. It allows user to donate for poojas from remote locations, watch live poojas going on in the mandir and book for an upcoming pooja all from this website.

EduNFT | React.js, Tailwind CSS, Solidity, Metamask, Hardhat, IPFS

- EduNFT is a NFT Marketplace for educational content creators. Content creators can convert their educational materials into NFTs on the platform. Creators can tokenize their materials and set prices, allowing them to monetize their expertise directly.
- The platform allows sellers to easily create NFTs, buyers to browse and purchase educational resources, and users to track their purchases through a list of items section.

VESIT Council Management System | Tkinter, MySQL Workbench

- This is an all in one application designed for the ease of various councils present in our college. The application provides information about all the upcoming events of councils where students can register for their desired event. It has a council GUI where the council can have a record about all the event and their participants.
- It is an Interactive System which provides the user with a chatbot to clear their query regarding any council/society/club or their events before showing their interest or registering for any event.

Position of Responsibility

Social Responsibility Team (SoRT) Secretary | July 2023 - March 2024

- Led a team of 18 people and conducted Fundraisers, Blood Donation Drives and Charity Drives in college for the people in need.

Social Responsibility Team (SoRT) Jr.Deputy Secretary | July 2022 - March 2023
