9967940476

Navi Mumbai, India

I am currently pursuing my Bachelors in Engineering & looking for opportunities to incorporate my skills and training to help the organization grow. I have always had a creative approach towards problem solving. Being an effective team player and always wanting to learn new things are some of my strengths.

EDUCATION

Bachelor Of Engineering(B.E.), Artificial Intelligence and Data Science

Vivekanand Education Society's Institute Of Technology

2021 - Present

CGPA : 9.60/10

HSC

Rao Junior College of Science

2019 - 2021

Percentage : 97.83%

SSC

Bharati Vidyapeeth English Medium School

2019

Percentage : 97%

EXPERIENCE

Intern

Vivekanand Education Society's Institute Of Technology

05/2024 - Present

Achievements/Tasks

- Title of Project : Analysis of fetal ultrasound images
- Domain : CNN, Python
- Description : Creating a comprehensive project involving image processing of ultrasound images to achieve dataset. Developing a neural network and training the model to identify anomaly within the ultrasound image. The model will further predict whether the provided fetus ultrasound image consists of any anomaly or not.

ORGANIZATIONS

Cultural Secretary (2023 - 2024)

Leading a group of 20 people as well as four distinct communities with an approximate of 10-15 members in each, to produce the college's most captivating events.

Junior Deputy Cultural Secretary (2022 - 2023)

Organized successful events under the leadership of our secretary, along with my team and gave my utmost to organize large gatherings.

Junior PR Officer (Technical Club - AIColegion) (2022 - 2023)

Explored the technical field by organizing the events such as hackathon's and workshops under this club.

SKILLS

Problem Solving

PERSONAL PROJECTS

AAROGYACHAR - An Alternate Therapy (2022)

- Tech Stack : Python, Machine Learning
- AAROGYACHAR is a recommendation based application that offers an interface to give precise instructions on what medications or treatments to take based on the user's symptoms.
- Our team also wrote a research paper on this particular project.

Text Translator (2023)

- Tech Stack : NLP, Python
- This is a purely python based project, where we made a clone of Google translate using APIs.

Healthcare Cost Prediction (2024)

- Tech Stack : Python, Machine Learning
- Collected and analyzed medical data from over 150 individuals, employing five supervised machine learning models to achieve exceptional accuracy and insights. The model with most accuracy was used to predict healthcare costs.

CERTIFICATES

Image Processing Onramp (08/2023)

Fundamentals Of Deep Learning (08/2023)

AWS Academy Cloud Foundation (03/2024)

Image Processing with MATLAB (03/2024)

INTERESTS

Dance

Painting & Sketching
