EDUCATION

Vivekanand Education Society's Institute Of Technology (VESIT)

B.E (Computer Engineering) | CGPA: 8.71

Chembur , Mumbai

2021-2025

Smt. Chandibai Himathmal Mansukhani College

HSC Science | Grade: 92.67%

Ulhasnagar, Mumbai

2019-2021

Sacred Heart

SSC | Grade: 89.20%

2019

Kalyan, Mumbai

About Me

I'm a BTech student studying Computer Engineering. I have a passion for technology and enjoy exploring new programming languages and software development techniques. I'm enthusiastic about learning and love to challenge myself with new projects and opportunities.

PROJECTS

StudentManager | Java — Swing — JDBC

Developed a comprehensive Student Management System utilizing Java Swing for intuitive user interface design and JDBC for efficient database management. Empowered administrators to effortlessly manage student records, including enrollment, and personal information, streamlining academic operations.

Purity Plants E-Commerce | React — Redux — Tailwind CSS

Created a full-fledged E-Commerce website, Purity Plants, using React, Redux, and React Router to enhance user interactions and manage application state effectively. Designed a modern and responsive user interface with Tailwind CSS. Implemented JSON Server to simulate backend operations, ensuring smooth data management and persistence.

Toggl Project Tracker | React — React Bootstrap

Developed Toggl, an intuitive project tracking tool enabling users to monitor project timelines efficiently. Empowers users to effortlessly track project progress, allocate time effectively, and stay organized throughout the project lifecycle.

XMLContactManager | Java — Swing — XML

Designed a Contact Management system enabling users to add and store contacts efficiently, utilizing Custom XML format for data storage. Implemented a user-friendly interface with Java Swing to display and manage contact details seamlessly.

Weatherly | HTML — CSS — JavaScript

Description: Weatherly is a sleek and user-friendly weather application designed to provide real-time weather updates for any location worldwide. Utilizing APIs such as OpenWeatherMap, it offers accurate forecasts, current conditions, and detailed weather information, ensuring users stay informed about atmospheric conditions wherever they go.

SKILLS

- **Soft-Skills:** Adaptive, problem solving, Hardworking
- **Technical Skills:** C, C++, Java, HTML, CSS, JavaScript, SQL, GIT
- **Frameworks and Libraries:** React, Bootstrap, Material Ui, Tailwind CSS
- **Tools:** VS code, Figma, Netbeans, MySQL Workbench
- **Automation Testing**
