EDUCATION

Bachelor of Computer Engineering — CGPA: 9.71

Expected 2025

Vivekanand Education Society's Institute of Technology, Mumbai

XII PCM with Computer Science — Cum.per: 95.6

2021

KM Agrawal College, Mumbai

EXPERIENCE

Mastek Limited

June'24 - July'24

Developer Intern-Legal Team

- Worked on full stack solution of data extraction from **Legal contracts** of the company.
- Tested various LLM for the data retrieval. Utilized **Microsoft Azure Open AI** model.
- Build an Arabic to English language translator to handle AMEA region contracts using Azure translator services.
- Real time **FAQ generation** and chat with contract functionality.
- Deployed this streamlit application on **Azure App Services** and implemented CI/CD workflows using GitHub actions for streamlined updates and continuous integration.

SKILLS

Programming Skills: Languages: **JAVA, C++, Python**

Technologies: **HTML, CSS, JavaScript, SQL, Streamlit, Langchain.**

Frameworks: **React js, Flask, Express, Node js, Flask.**

Developer Tools: **Git, Github, Microsoft Azure, MongoDB.**

ACHIEVEMENTS

- **Winner of Mastek's Deep Blue Season 9 Hackathon** with a prize money of **1.5 lakhs.** May 24
- **Top 20 finalist** in National HealthCare Hackathon organized by IIIT Sricity. [\(Link\)](#) December 23
- Was among the **top 5 finalists** in INVICTUS hackathon conducted by ISTE-VESIT. [\(Link\)](#) February 23

PROJECTS

FinCalls - Corporate Earning call Analyzer and Annual Public report Chatbot | *Python, Flask, Reactjs, MongoDB, PaLM2, Streamlit, Langchain, NLP* [\(Link\)](#)

- An end to end solution for investor to get financial insights from three types of data, which are corporate earnings calls, annual public report and real time data. We have **4 modules** for call analyzer, a FAQ chatbot which deals with **annual public report** of companies and latest stock, news update of companies.
- Developed transcription, summarisation, timeline analysis of the provided earnings call by robust NLP and NER techniques.
- Utilized **Google's PaLM2 language model** for the chatbot and faiss as vector database making our model capable of answering various queries including **tabular form** and possible visualization.
- Added **google custom search** API to search reports all over the web functionality.
- Real time stock price and latest news update of companies specified by user, which are fetch from Yahoo finance and New API respectively.

TKArt - Art Studio | *Reactjs, Nodejs, Express, MongoDB and Redux-toolkit*

[\(Link\)](#)

- A full-stack web application for artists to showcase and sell their artworks.
- Authentication, Shop, Add to Cart functionality is added for buyers.
- For state management, used Redux that stores dynamic data updates.

Hearthy - Healthcare webapp | *Python, Flask, HTML/CSS, JAVASCRIPT*

[\(Link\)](#)

- Develop an app for user to know about their heart health by taking lipid test and give them alerts accordingly.
- Implemented video calling using Agora WebRTC SDK for contacting doctor.
- Utilized a robust backend framework flask which optimized overall performance.

POSITION OF RESPONSIBILITY

- **Jr. Technical Officer at CSI-VESIT (Computer Society of India)**
Part of the managing team during various tech/non-tech events and conducting workshops.
- **VESIT Brand Ambassador Team member**
Responsible for creating captivating content and volunteering during the events conducted.
