I am a goal-oriented, determined, and ambitious individual with a passion for programming. As an Electronics and Telecommunication Engineer, I possess deep knowledge in Networking Fundamentals and hold an Honors degree in Artificial Intelligence and Machine Learning.

EDUCATION

Vivekanand Education Society Institute of Technology, Chembur 2022-2025
B.E. Electronics and Telecommunication Engg, Minor: Artificial Intelligence and Machine Learning CGPA: 8.84 (Sem 6)
Relevant coursework: Data Structures, DBMS, Python, Java, C++.

Veermata Jijabai Technological Institute, Matunga 2019-2022
Diploma - Electronics Engg Percentage: 89.74%

St. John The Baptist High School, Thane SSC Percentage: 88.00

WORK EXPERIENCE

Reliance JIO | *Project Intern - JIO Airfiber Chatbot Developer* May 2024 – June 2024

- Developed and enhanced chatbot features using natural language processing (NLP) to improve user interaction and support.
- Collaborated with senior developers on testing, debugging, and integration to ensure seamless performance and streamlined customer service operations.

CPulser | *Project Intern - Electronic System Developer* May 2024 – July 2024

- Designed and developed precision pulser generator system, focusing on high accuracy and reliability.
- Collaborated with the engineering team and worked on test, troubleshoot, and optimize system performance.
- Assisted in the creation of detailed schematics and documentation for the system.
- Conducted performance analysis and made recommendations for improvements.
- Supported the integration of the new system into existing electronic frameworks.

PROJECTS

Object Detection Algorithm on Custom Database

- Developed an object detection program for identifying a class of objects, specifically cats. Processed and enhanced a proprietary dataset of 1000 cat images. Trained a neural network on this dataset, achieving accurate detection of cats and distinguishing them from non-cat objects.
- Demonstrated proficiency in Python programming, image preprocessing, and successful implementation of object detection algorithms.

Designing Of Multiband Fabric antenna

- Currently engaged in the design and development phase of a multiband fabric antenna that will be seamlessly made using fabric as the base, with the ultimate objective of embedding it into various types of clothing.
 - This innovative antenna is specifically engineered to transmit emergency signals effectively, employing advanced fabric-based materials and cutting-edge techniques.
-

ACHIEVEMENTS

Certifications

- Diploma in C & C++.
 - Complete Networking Fundamental Course
 - Internship on Embedded System Design and IOT
-

SKILLS

- **Languages:** C/C++, Python, Java,, HTML/CSS, JavaScript
 - **ML Libraries:** NumPy, Pandas, Matplotlib.
 - **Visualization Tools:** PowerBI, Tableau
 - **Other tools:** Git, Figma, VSCode, PyCharm, Vivado HLX, Cadence virtuoso
-

EXTRACURRICULAR

- JR. Editor - IEEE VESIT
- CO-ORDINATOR - IEEE VESIT
- Managing Member - Pratibimb VJTI
