

VEDANT J. PAWAR

9545828954 ◇ Mumbai, Maharashtra

vedantjpawar3019@gmail.com ◇ [LinkedIn](#) ◇ [College Mail Id](#)

OBJECTIVE

Motivated engineering graduate with a degree in Electronics Engineering, seeking an entry-level position to apply skills in circuit design, embedded systems, PCB layout, and programming languages (Java, HTML, CSS and Javascript) to contribute to innovative projects and team success.

EDUCATION

Bachelor of Electronics Engineering, VESIT Expected 2025
CPGA :- 8.95 (Upto Semester 6)

HSC, Maharashtra State Board 2021
Grade :- 86%

SSC, Maharashtra State Board 2019
Grade :- 83.60%

SKILLS

Hardware Skills :- PCB Designing, Basic VLSI Design, IoT , Embedded Systems.

Software Skills :- Java , HTML , CSS and Javascript.

Soft Skills :- Leadership, Communication, Time Management, Problem Solving, Teamwork.

EXPERIENCE

Class Representative 2022 - 2024
VESIT *Chembur , Mumbai*

- Advocated for student needs and interests through facilitated communication and organized meetings and events.

Placement Coordinator 2024 - Present
VESIT *Chembur , Mumbai*

- Managed placement database and records, enhancing student preparedness and fostering industry relationships.

Jr. Intern Nov 2023 - Dec 2023
Powertron India Pvt. Ltd. *Wagle Estate , Thane*

Assisted in the testing of power supplies and inverters, gaining hands-on experience with manufacturing processes and quality control procedures.

PROJECTS

1) FPGA Implementation of Channel Encoder and Decoder. Successfully Implemented Encoder and Decoder in Digital Communication using FPGA Board.

2) IoT Based Industrial DC Motor Control. Controlled and Operated Industrial DC Motor using ESP 8266 and Phenomenon of Pulse Width Modulation (PWM).

3) Temperature Based Industrial Ventilation Control System. Controlling Temperature, Pressure and Humidity in Industries through Vents using Raspberry-Pi.

4) 3-Bit Ring Counter. Designed and Tested 3-Bit Ring Counter on Cadence Virtuoso.

5) Smart Systems for Crisis Prediction and Mitigation Objective: Develop lightweight prediction models on Raspberry Pi 4 Model B for high accuracy, real-time data analysis in resource-constrained environments.
