SKILLS

- Java
- Data Structures and Algorithms
- C-Programming.
- HTML
- CSS
- JavaScript
- React JS
- Express
- MySQL Database

PROJECTS

Blog Website in React JS-

- Developed a blog website using React JS where users can sign up with their Google account.
- Implemented functionality for users to create and delete their blog posts, as well as read blogs from other users.
- Stored blog posts, titles, and IDs in Firebase as a database.
- Required users to log in to create blog posts.

Visitor Management System

- Crafted using the React framework for the frontend.
- Used Express for the backend.
- SQL serves as the database to store and manage visitor information.

Authentication System with React JS and Firebase

- Developed an authentication system using React JS and Firebase. Implemented user sign-up, login, and forgot password functionalities.
- Utilized Firebase authentication services for secure user authentication.
- Integrated email functionality to send password reset emails to users. Enhanced user experience with a seamless login and password reset process.

WORK EXPERIENCE

JavaScript Developer Intern | January 2024-February 2024

Mira Advanced Engineering

- Developed four websites using React JS, including two loan calculator apps.
- Designed and implemented a visitor management app, utilizing SQL for data storage.
- Created a system for updating and deleting employee salary information using sql database.

Software Developer Intern | July 1, 2024-August 30, 2024 (ongoing)

Bluestock Fintech

- Created a front-end interface using HTML, CSS, and JavaScript.
- Displayed information such as company logo, name, price band, opening and closing dates, issue size, issue type, listing date, status, IPO price, listing price, listing gain, current market price (CMP), and current return.
