EDUCATION

Vivekanand Education Society's Institute Of Technology (VESIT).
Bachelor of Engineering, Computer Engineering, CGPA, 9.19

2021 – 2025

Smt. Chandibai Himathmal Mansukhani College.
Higher Secondary Certificate (HSC), Percentage, 95%

2019 – 2021

Holy Family Convent High School.
Secondary School Certificate (SSC), Percentage, 92.4%

2018 – 2019

PROJECTS

MEMORY MINGLE (SPRING BOOT, ANGULAR, MSSQL)

- Developed a memory enhancement application utilizing Angular for the frontend and Spring Boot for the backend, with MSSQL as the database.
- Designed for children under 10, the game enhances memory skills in an engaging manner through two games: a card game and a shape game.
- Implemented levels to gradually increase difficulty and maintain player engagement.
- Integrated parental control features allowing parents to set game access timers for their children.
- Implemented a monthly report generation system to analyze and monitor children's progress, providing valuable insights to parents.

MEDIUM-OVERFLOW (SPRING BOOT, ANGULAR, MSSQL)

- Developed a dynamic blogging platform using Angular, Spring Boot, and MSSQL.
- Designed the infrastructure and implemented secure user authentication, allowing seamless sign-up and login. Enabled users to create, edit, and categorize blogs with a sophisticated text editor, fostering community engagement through likes and comments.
- Introduced a scheduling feature for blog posts and implemented email notifications to keep users informed about likes and comments.

QUICKBOOK (SPRING BOOT, ANGULAR, MSSQL)

- Developed a comprehensive service booking website using Angular for frontend, Spring Boot for backend, and MSSQL for database.
- Implemented service categorization, allowing customers to browse and select services from different categories.
- Enabled viewing of previous bookings for customer convenience.
- Set up email notifications to inform customers upon successful booking.
- Configured email notifications for workers with necessary details to facilitate timely and accurate service delivery.

FOOD ORDERING SYSTEM (JAVA SWINGS)

- Designed an intuitive and visually appealing user interface using Java Swings, ensuring an enhanced user experience.
- Created a dynamic menu display with a wide range of food items, providing essential details such as names, descriptions, and prices.
- Implemented a user-friendly item selection mechanism, allowing customers to pick their preferred dishes using checkboxes.
- Programmed the system to calculate the total bill by summing up the prices of selected items and quantities.

SKILLS

- **LANGUAGES:** C | Java | Python
- **WEB TECHNOLOGIES :** HTML | CSS | JavaScript | Bootstrap
- **FRAMEWORKS:** Spring Boot | Angular
- **DATABASE:** MySQL | MS SQL
- **TOOLS:** Git | Canva | PowerPoint | MS Office | MS Excel
- **IDEs :** VsCode | PyCharm | IntelliJ

EXTRA-CURRICULAR ACTIVITIES

- Secured a position in the top 10 at the "Ideathon" hackathon, hosted at IIT Jodhpur.
- Engaged in inter-college hackathon by Thadomal Shahani Engineering College.
- Participated in DevQuest, a hackathon organized by IIT Jodhpur.
