

VISHAKHA SINGH

9146141313 | ssvis786@gmail.com | [LinkedIn](#)

EDUCATION

Vivekanand Education Society's Institute of Technology

B. E. in Computer Engineering, Honors in Artificial Intelligence and Machine Learning

- **CGPI:** 9.85/10 (Aggregate Till Sem 6)

Chembur, Maharashtra

2021 - Present

St. Xavier's International School

HSC (Maharashtra Board)

- **Result:** 88.83% [PCM, Geography]

Kalyan, Maharashtra

2019 - 2021

INTERNSHIP/EXTRACURRICULAR EXPERIENCE

Kode With Klossy

Web dev trainee

July 2022 - July 2022

- Created a website "Saree Not Sorry" that highlights the exploitation of South-East Asian Workers.
- Worked with students from London and Abu Dhabi.

ISA VESIT

Chief Technical Officer

May 2024 - Present

- Worked on [Inventorium](#) and the official [app](#) and [website](#) of ISA VESIT.
- Managed the deployment of Inventorium.
- Managed events and workshops, showcasing leadership and organizational skills.
- Hosted "Database Connectivity Using Web Development" and "Chat GPT clone Using Django and Hugging Face" workshops.
- Secured six sponsors for major events, demonstrating strong relationship-building abilities.
- Previously worked as Executive and Second Year Coordinator at ISA VESIT from 2023-24.

PROJECTS

Text Emotion Detection Using Machine Learning (Machine Learning)

[Repository & Paper](#)

- The model uses Linear Support Vector Machine (LSVM), Random Forest (RF), Logistic Regression (LR), Count Vectorizer (Count Vectors), and Term Frequency-Inverse Document Frequency (TFIDF) to make predictions.
- 89% accuracy obtained using Logistic Regression.

Data-Driven Analysis of Amazon Prime Videos (Data Analysis)

- Used Python to draw conclusive and meaningful results from the dataset.
- Kids, Action, Drama, and Comedy are the most-watched genres; most TV shows are in English (>400), with Hindi (<50) second; 2018 saw the most releases (>75), followed by 2019, 2017, and 2016; shows like Forensic Files, NCIS, Grey's Anatomy, Supernatural, Doctor Who, Two and a Half Men, The Big Bang Theory, Blue Bloods, Shameless, and Hawaii Five-O have 10 or more seasons.

Inventorium (Django)

[Website](#)

- The site is powered by Django, a high-level Python web framework, ensuring a secure, scalable, and efficient web application.
- This website showcases a detailed list of hardware items available in the ISA VESIT's inventory, making it easy for students to find and borrow the necessary equipment.
- Developed collaboratively by a team of five, leveraging the power of teamwork to create a robust and functional platform.

A Comprehensive Exploration Of Data Security Techniques Using Image Steganography (Deep Learning)

[Repository](#)

- Tools like Steghide, OpenStego, and OpenPuff are used for text in image steganography.
- The dataset is generated using Discrete Cosine Transform with PSNR and SSIM of 45.46 and 0.9981 respectively.
- Algorithms like Scale Invariant Frequency Transform, Gaussian Mixture Models, Spatial Rich Model, and Shannon Entropy are used to recognize the difference in pixels of 2 images and predict the image's nature.
- CNN, ResNet, and Batch Normalisation are used for training neural networks. Batch Normalisation gave 99.32% on training and 99.29% on validation.

SKILLS & INTERESTS

Programming Languages: Java, Python, C.

Web Development: HTML, CSS, Node.js, Django.

Database Management: SQL.

Version Control: Git.

Machine Learning & Deep Learning.

ACHIEVEMENTS

- Won best presentation in "BuzzPro" Technical Paper Presentation held at department level in VESIT.
- Published [Text Emotion Detection Using Machine Learning Algorithms](#) in IEEE Xplore as a Second Year student.
