

ABHISHEK JADHAV

Software Developer

Mumbai

heyabhishekjadhav@gmail.com | +91 9699331785

EDUCATION

VIVEKANAND EDUCATION SOCIETY INSTITUTE OF TECHNOLOGY. B.E IN INFORMATION TECHNOLOGY

Grad : 2025

CGPA : 9.23

NVP'S COLLEGE OF ARTS , COMMERCE AND SCIENCE. PUNE UNIVERSITY | HSC

2018-20

HSC : 97.17

PROFILE

GitHub: Abhishekk24

Leetcode: jadhavabhishek24k2

LinkedIn: abhishekkjadhav

SKILLS

Programming Languages:

• Java • C • Python

Web Development:

• HTML • CSS • JavaScript

Frameworks:

• React.js • Next.js • Node.js

• Express.js • Flask • TS

Database:

• MongoDB • Firebase

Version Control:

• Git

Data Science:

• Data Cleaning • Data

Preprocessing • CNN • Regression

Model

CERTIFICATES

• Nvidia 

• Google Cloud 

• Google CyberSecurity 

• HackerRank : SQL Basic and

Intermediate 

• Internship 

(Exposys Data Labs) , (KSI)

WORK EXPERIENCE

STAR UNION DAI-ICHI LIFE INSURANCE | Lead SDE Intern

July 2023 - present

- Lead Developer : Assigning projects and monitoring their progress to ensure timely completion.
- Collaborated with cross-functional teams to optimize email communication efficiency and extract valuable data from web sources.
- Engaged in developing an AI avatar to increase website engagement for visitors
- Serving as the contact between the company and the college, ensuring smooth communication and coordination.
- Developing custom software solutions tailored to the company's specific needs, enhancing efficiency and productivity.
- Utilized programming skills to create automated systems, streamlining repetitive tasks and improving overall workflow.

VINR ENTERPRISES | Web Developer

November 2023 - May 2024

- Designed, developed, and maintained company websites, ensuring optimal performance and user experience.
- Implemented regular updates and upgrades to websites, utilizing the latest technology stack to improve functionality and stay ahead of industry trends.
- Collaborated with stakeholders to understand requirements and deliver solutions aligned with business objectives.
- Conducted routine maintenance to ensure website stability and security, contributing to a seamless online presence for VINR Enterprises.

PROJECTS

ACCIDENT MANAGEMENT SYSTEM

Flask | Firebase | Python | Arduino IDE

- Implemented an Accident Management System leveraging IoT sensors such as the DS18B20 temperature sensor and MPU6050 accelerometer.
- The system is designed to trigger alerts when sensor readings surpass predefined thresholds ex. 10 degrees. Upon activation, alerts are promptly relayed to nearby authorities, enabling swift response and intervention.

WAREHOUSE CONNECT

Next.js | Firebase

- WarehouseConnect initiative was developed to increase efficiency in food supply management and minimize food wastage
- Its primary objective was to connect vacant warehouse spaces with stakeholders in need, thereby optimizing surplus food distribution and improving supply chain efficiency.

VIDCRAFT

Flask | Firebase | JS | OpenCV

- Adapted text-based content into videos to suit visual learners and those with limited literacy skills.
- Utilized Python libraries such as OpenCV, along with Firebase and SQLAlchemy, for streamlined conversion processes.
- Achieved an 80 percent accuracy rate in translating articles to videos, with post-conversion accuracy ranging from 50 to 60 percent.
