EDUCATION:

Vivekanand Education Society's Institute of Technology

Mumbai, India

Bachelor of Engineering in Computer Engineering, **GPA: 9.2/10**, Honors in Data Science

Dec 2021-May 2025

Relevant Coursework: Artificial Intelligence, Quantitative Analysis, Algorithms and Data Structures, Database Management Systems, Machine Learning, Cloud Computing, Software Engineering, Computer Networks.

D.A.V. Public School

Panvel, India

Senior Secondary (XII Grade), **Percentage: 95%**, Stream: Science with Computer Science, Board: CBSE

June 2019-April 2021

Secondary (X Grade), **Percentage: 95.2%**, Board: CBSE

April 2017-April 2019

WORK EXPERIENCE:

JSW

Ratnagiri, India

Python Developer Intern (On-site)

May 2023– July 2023

- Developed an interactive Python dashboard for attendance records, enhancing data visualization and accessibility.
- Automated the scheduling of attendance data emails, streamlining communication and reducing manual effort.

JSW

Remote(Goa, India)

Data Science Intern

November 2023– December 2023

- Built a dashboard for the company displaying all the company employees' and contractors' data using Flask, Python, SQL, and HTML.
- Designed unique visualizations of the currently present employees on the port premises, facilitating real-time tracking and reporting.

LEADERSHIP EXPERIENCE

Computer Society of India, VESIT

Mumbai, India

Operations Secretary

January 2023– Present

- Organized events and increased memberships, enhancing the operational efficiency and success of the society.

ACADEMIC PROJECTS:

CognitiveCare | Machine Learning

August 2023 - April 2024

- Developed a machine learning system using CNN and V3 models to detect Alzheimer's and suggest remedies, contributing to healthcare solutions.

JSW Attendance Dashboard | SQL, Python

June 2023 - December 2023

- Built a dashboard to fetch real-time data from SQL and provide meaningful visualizations, improving attendance tracking and reporting.

JSW Automated Attendance Email Scheduling | SQL, Python

May 2023 - July 2024

- Automated the scheduling of attendance emails using data from the SQL-Python dashboard, reducing manual workload and ensuring timely communication.

Alumni Tracking System | Flutter

October 2022 - April 2023

- Developed an app to connect alumni with students and administration, fostering better networking and communication.

CI/CD Pipelining using Gitlabs and AWS

- Deployed an application to Kubernetes in a CI/CD pipeline using AWS App Mesh, Gitlab, and Amazon EKS, implementing canary deployments and service mesh for traffic control and safe rollbacks, enhancing testing and deployment reliability.

PUBLICATION:

[Cognitive Care: Comprehensive Detection and Management of Alzheimer's Disease](#) | [Link](#)

- Published in May 2024. This research paper focuses on using CNN and V3 models for the detection of Alzheimer's disease and suggesting appropriate remedies.

SKILLS:

Programming (C, Python, R), Machine Learning (TensorFlow, Keras, Scikit-Learn), Data Science (Pandas, NumPy, Matplotlib, Seaborn), Data Visualization (Tableau, Power BI), DB Management (SQL, MS SQL Server), Cloud Computing (AWS, Kubernetes), Web Development (HTML, CSS, JavaScript).
