SKILLS

Programming Languages: Java,C, Python (NumPy, SciPy, Matplotlib, Pandas)

Tools and Technologies: Flutter, HTML, CSS , JavaScript, NodeJS, React, GIT, YOLOV8 , OpenCV, MYSQL, Firebase, MongoDB, PHP

EXPERIENCE

Web Development and AI Intern (OnCampus) TechAsia Nov 2023 – Jan 2024

Developed an object detection model and interface software (Python and web-based) for integration with IoT bulbs and alarm systems. Utilized YOLOv8 model architecture and Roboflow for dataset preparation. Aim was to create a model that detects humans for IoT bulbs and dangerous animals for the alarm system. Also, to create a user-friendly interface to manage the model parameters.

ACADEMIC AND EXTRACURRICULAR ACHIEVEMENTS

KnowCode '24 Hackathon Winner (Conducted by KJ SOMAIYA)

2024

Contributed to the winning team at KnowCode 2024, securing Rs 25,000 for "Medureka" an innovative medicine ordering system addressing rural challenges in a 36-hour effort.

Syrus '24 Hackathon Vesit (2nd Prize)

2024

Contributed to a collaborative effort developing an app for Alzheimer's patients. The app aids in tracking daily activities and maintaining memory. A 24-hour effort resulted in its creation.

EDUCATION

Vivekanand Education Society's Institute of Technology (VESIT)

2021 – 2025

Bachelor of Engineering(B.E) in Computer Engineering | CGPA:9.85/10 (upto sem VI)

Lakshya Prep High School and Junior College, India

2019 – 2021

HSC(Class XII) | Aggregate(95.5%)

St. Lawrence High school, India

2016 – 2019

SSC(Class X) | Aggregate(89.2%)

PROJECTS AND REASEARCH

Gyaan Saathi | Dart,Python,Flutter,flask,firebase (Google Solution Challenge)

Repo Link

This is a flutter application to help and support specially abeled students through quiz and interactive games.It includes games like TicTacToe, Memory Game,match the same pictures.Teacher and student have separate user interfaces. Teacher can assign quiz to students in real time .

Medicine Ordering IVR app | Dart,Python,Flutter,flask,firebase

Repo Link

This is a flutter-flask application which aims to simplify medicine ordering. Develop an IVR (Twilio) based payment system for rural india, Flutter and Flask for mobile application operations.

Tour-Sentiments | React,Sql,Express,Google Cloud(Maps),Bard

Repo Link

This is a Website that recommends day wise itenaries to tourists connected via a route on maps.The User can feel like visiting the place via street view from google maps.

EduShala app | Dart,Python,Flutter,firebase

Repo Link

This was a flutter application that we built in a hackathon which helps drop-outs and underprivileged students to continue their education through free YouTube videos and community help.
