ABOUT ME

I'm passionate about driving impactful tech innovations and eager to dive into the latest advancements. and regularly participate in **Hackathons** to stay up-to-date with the **latest technologies**. Detail-oriented and a team player, I blend creativity, **problem-solving**, and sharp thinking to make a difference.

SKILLS

- **Coding Languages**
java, JavaScript, Python, C
- **Frameworks**
ReactJs,Tailwind CSS, NextJS, NodeJs, Android
- **Database and Backend Services**
SQL, MongoDB, Firebase
- **DevOps**
Git &GitHub, Docker, AWS
- **Soft Skills**
Team Worker, Leadership, Quick Learner,
Time efficient, Communication

ACHIEVEMENTS

- **2nd at All India Women Only Hackathon**
 - Organized by Shooting stars foundation
 - [Certificate](#)
- **3rd at RotaCodefest Hackathon**
 - Organized by Rotary Club of Mumbai Ghatkopar west
 - [Certificate](#)
- **Scholarship**
 - Ekam Foundation Mumbai
 - [Certificate](#)

EDUCATION

VES Institute of Technology,Mumbai
B.E. in Information Technology (2021-2025)

- **CGPA - 9.23**

SIES College of Arts, Science & Commerce, Mumbai
HSC (Science)(2019-2021)

- **92.67%**

SIES High School,Mumabi
SSC (2019)

- **85.80%**

EXPERIENCE

Exposys Data Labs | Web Developer Intern | June 23-July 23

- Built an Video Calling Website using HTML, CSS, JavaScript and WebRTC

IEEE-VESIT | August 2023 - March 2023

- Volunteer
- Leadership and Collaborative work.
- Conducted Workshop's

PROJECTS

Waste Wise Web | [Github](#)

- Waste Wise Web is dedicated to addressing the global waste crisis by providing accurate information on proper waste disposal. Our platform empowers individuals and communities to combat misinformation, fostering a collective effort for a cleaner, healthier planet.
- **Tech Stack - Client: React Js + Vite, TailwindCSS, Node Js**
Database: Firebase
Map: Leaflet

HAND GESTURE VISION

- Developed using **Django framework** and **Python** language, Deep learning Models such as Tensorflow, Keras.
- The system captures video input, preprocesss it, and feeds it into a trained model that predicts the corresponding sign gesture.

VIDEO CALLING WEBSITE

- The website is developed using **HTML**, **CSS**, and **JavaScript** Programming language.
- The website supports various features such as allowing access to audio, video, and screen sharing.
- The browser supports **WebRTC**, which is a set of **JavaScript APIs** that allow us to establish a peer-to-peer connection between two browsers to exchange data in real time.

DESKTOP VOICE ASSISTANT | [Github](#)

- Developed using **Python** Programming Language
- Aimed to create a user-friendly virtual assistant capable of performing various tasks based on user requests.
- The functions supported by the assistant include opening WhatsApp Web and sending messages, accessing the camera, providing news updates, playing music, opening YouTube, and displaying the device's CPU storage.

DiaCare

- The Project aimed to develop Diabetes Prediction Model to analyze daily intake, habits and predict diabetes likelihood accurately.
- The model is trained with 80% of accuracy. Integrated Chatbot to provide real time assistance and information regrading diabetes prediction and personalized diet plans.
