B.E Computer Engineering, VESIT, 2021-Present

CGPA:9.19

HSC, C.H.M College - 2021

92.67%

SSC, St Thomas English School - 2019

88.00%

SKILLS

Languages : Java, Python, C
Web : HTML, CSS, JavaScript
Framework : Angular, Spring Boot, Bootstrap
DataBase : MSSQL, MySQL, Oracle
Tools : GitHub

PROJECT

GameHub

Angular, Spring Boot, MS SQL

- Implemented various memory-based games like card-matching and pattern recognition.
- Each game consists of three levels: easy, medium and hard.
- Parents can monitor the number of matches played and progress of their children.
- Parents can set a time limit for daily use.

Job Portal

Angular, Spring Boot, MS SQL

- Implemented an application with 3 user roles : admin,recruiter and candidate.
- Enabled candidates to create and upload resumes for job applications directly on the platform.
- Facilitated job search and application process for candidates.
- Empowered recruiter of an authorized company can post jobs and select suitable candidates.
- Admin can verify companies based on the license they provided for registering.

Timetable Generator

Angular, Spring Boot, MS SQL

- Developed an application that provides college students with their schedule.
- Prevents conflicts in scheduling lectures for each batch.
- Enables bulk uploading of student information.

CO CURRICULAR ACTIVITIES

- Intra-College Hackathon : DevQuest Hackathon at Prometeo '24-IIT Jodhpur.
