PROFILE

I'm a highly motivated final year Computer Engineering student at VESIT, currently engaged in a Machine Learning project to enhance my expertise and contribute to cutting-edge technology. I've worked as a designer for the department's newsletter team and have participated in various hackathons and college-level competitions, both co-curricular and extracurricular.

EDUCATION

Bachelor of Engineering in Computer Science with Honors In AIML

Vivekanand Education Society's Institute Of Technology,Chembur | CGPA-8.67

HSC

Jaipuria School,Sanpada | Percentage:-84%

SSC

New Horizon Public School,Airoli | Percentage:-94.2%

INTERSHIPS

- **Engineering Innovations Intern | EY(Ernst and Young)** (Feb 2024 - present)
I developed a resume evaluation tool using Streamlit and integrated Google's GenerativeAI API for natural language processing. The tool processed PDF resumes and generated AI-driven evaluations based on prompts. Resumes were formatted into structured PDFs with sections for personal information, skills, professional summary, work experience, and education.
- **Summer Intern | VESIT** (May 2024 - July 2024)
The project involved collecting and preprocessing images of heritage artifacts, then trained a YOLO model to detect and classify impairments. The model was integrated into a system with interfaces for image upload and result display, followed by testing and evaluation for accuracy and efficiency.

PROJECTS

- **GrocerySpot | Flutter, Firebase**
A complete grocery app for all your needs .Android Application which helps you add grocery items and place orders according to your convenience.
- **Lung Disease Classification | ML**
Predict and classify the lung diseases Based on the X ray scans provided by the user, the trained model will be able predict and classify lung diseases (COVID-19, Bacterial Pneumonia, Viral Pneumonia, Tuberculosis). Built it using Machine Learning Algorithm

SKILLS

Programming languages - Java, Python, JavaScript, Html, CSS, SQL, C

Frameworks - React

DataBases-Mongodb, MYSQL

Libraries- Pandas, Matplotlib, Numpy

Machine Learning Algorithms

CERTIFICATIONS

Networking Basics (Cisco)

The Complete 2023 Software Testing Bootcamp ([Udemy](#))

The Complete Theory of Computation ([Udemy](#))
